UME PLATFORM

High-Fidelity User Screen Flows

UME-HIFI-001 · v1.0.0 · March 2026

UME Design & Product · Internal

60+ screens · 15+ user flows · OrgOS · OrgApps · DAO · DLT

Document Overview

This document provides high-fidelity screen flow specifications for the UME Platform — the Organisation Operating System (OrgOS) factory for building, running, and scaling any organisation. Each section covers a major platform module, with detailed wireframes for every screen, navigation flow tables, and interaction annotations.

How to Read This Document

Each module section contains: (1) a flow overview table listing all screens in sequence with their type and description; (2) transition arrows showing navigation triggers between screens; (3) detailed ASCII wireframes showing the exact layout of each screen with all UI elements; and (4) numbered annotations explaining key interaction behaviours.

Platform Architecture Summary

The UME platform is an Organisation Operating System (OrgOS) factory. It provisions tailored OrgOS instances for any organisation. The core concepts reflected in these screens are:

OrgOS

The configurable operating system for a specific organisation. Composed of OrgApps (modules) managed by the OrgKernel.

OrgExec / OrgCPU

Executors of work: humans, AI agents, hybrid systems (OrgExecs) and machines/devices/IoT (OrgCPUs). Governed by ODD contracts.

ODD (OrgDeviceDriver)

The contract defining how each OrgExec/OrgCPU operates within the OrgOS — capabilities, constraints, data access, and audit requirements.

OrgDNA

The exportable master configuration package of an OrgOS — can be cloned, forked, or published to franchisees.

SDO (Software Defined Organisation)

The digital twin of a physical organisation — a live representation of all running OrgApps, data flows, OrgExecs, and organisation health.

DAO & DLT

Multiple OrgOS instances can form a Decentralised Autonomous Organisation (DAO). Inter-organisation transactions are recorded on a Distributed Ledger (DLT) with smart contract governance.

Modules Covered

Module	Flows	Screens	Description
A — Auth & OrgOS Bootstrap	2	9	Sign-up, email verify, MFA, template gallery, module config, launch
B — Executive Dashboard	1	4	KPI overview, drill-downs, alert centre

C — Finance & Accounting	1	4	Journal entries, P&L, balance sheet, audit trail
D — HR & People	1	7	Employee lifecycle, OrgExec types, leave management
E — Legal & Compliance	1	5	Entity registry, filing calendar, document vault
F — Risk & GRC	1	4	KRI monitoring, risk register, incident escalation
G — Sales & CRM	1	5	Customer management, order kanban, invoicing
H — Operations / ERP	1	4	Inventory, purchase orders, equipment IoT
I — OrgSystem & OrgApps	1	5	OrgOS control panel, app marketplace, configuration
J — OrgExec & ODD	1	4	OrgExec registry, ODD editor, AI agent deploy
K — DAO & DLT	1	6	DAO formation, smart contracts, franchise network, ledger
L — Digital Twin (SDO)	1	3	Live org topology, flow map, AI optimisation
M — Settings & Admin	1	5	Users, roles, integrations, billing
N — Work & Portal	1	4	Sprint board, employee portal, leave requests
O — Marketing	1	4	Campaigns, micro-personas, AI content generation

MODULE A · Authentication & OrgOS Bootstrap

New user registration, login, MFA, and the full OrgOS configuration wizard.

FLOW-A1 — New Account Registration & OrgOS Bootstrap

Actor	New User (any)
Time Target	< 15 minutes
Description	A new user creates an account, verifies email, selects an OrgOS template, configures core modules, and launches their Organisation Operating System.

Screen Flow Sequence

Screen ID	Screen Name	Type	Description
SCR-AUTH-01	Landing / Sign-Up	Form	Email, password, full name, organisation name input. Terms acceptance. SSO options.
SCR-AUTH-02	Email Verification	Gate	6-digit OTP entry. Resend link. Timer countdown. Auto-advance on success.
SCR-AUTH-03	MFA Setup	Wizard Step	TOTP QR code or SMS choice. Backup codes download. Skip (30-day grace).
SCR-AUTH-04	OrgOS Template Gallery	Gallery	Industry templates: Dry Cleaning, Professional Services, Retail, SaaS, Nonprofit, Blank.
SCR-AUTH-05	Module Configurator	Wizard Step	Toggle modules on/off. Select tier (Starter/Growth/Enterprise). Show dependency graph.
SCR-AUTH-06	Entity & Jurisdiction	Wizard Step	Legal entity type, jurisdiction, tax ID. Auto-fetches compliance requirements.
SCR-AUTH-07	Invite Team	Wizard Step	Invite emails with role assignment. Skip option. OrgExec type selection (Human/AI/Hybrid).
SCR-AUTH-08	OrgOS Launch Screen	Confirmation	Animated OrgOS boot sequence. Progress bars. Jump to Dashboard.

Navigation Flow

SCR-AUTH-01 —[Submit Form]→ **SCR-AUTH-02**
SCR-AUTH-02 —[Verify OTP]→ **SCR-AUTH-03**
SCR-AUTH-03 —[Setup/Skip MFA]→ **SCR-AUTH-04**
SCR-AUTH-04 —[Select Template]→ **SCR-AUTH-05**
SCR-AUTH-05 —[Configure & Continue]→ **SCR-AUTH-06**
SCR-AUTH-06 —[Set Entity]→ **SCR-AUTH-07**
SCR-AUTH-07 —[Invite/Skip]→ **SCR-AUTH-08**

Screen Wireframes

SCR-AUTH-01 Landing / Sign-Up

```
UME
The Operating System for Business

Start your free
Organisation OS

✦ Configure any
  business in
  minutes

✦ 50+ modules,
  one platform

✦ Scale from solo
  to enterprise

account?  Sign in

Full Name
Business / Org Name
Work Email
Password            [show]
☑ I agree to Terms of Service
[  CREATE MY ORGOS  ──► ]
──────── or ────────────
[G] Continue with Google
[M] Continue with Microsoft
```

① Centred split layout: value prop left, form right
② Password strength meter appears on keystroke (Weak/Fair/Strong/Very Strong)
③ Form auto-detects business type from name using ML classifier
④ SSO providers pre-configured; SAML enterprise available on Enterprise tier

SCR-AUTH-02 Email Verification

```
← Back to sign-up                                   ume platform

✉ Check your inbox

We sent a 6-digit code to bob@dryclean.com

[ _ ] [ _ ] [ _ ] [ _ ] [ _ ] [ _ ]
← enter code →

Code expires in  02:45

[     Resend Code (2 left)     ]

Didn't receive it? Check spam or use a different email
```

① Auto-advances when all 6 digits entered — no submit button needed
② Countdown timer resets on resend. Max 3 resend attempts then lockout with support link
③ On success: celebratory micro-animation, then slide to next step

SCR-AUTH-04 OrgOS Template Gallery

```
Step 2 of 5   ●●○○○                    [ Skip — start blank ]

Choose a template for your Organisation OS
```

```
Pre-configured modules, workflows and reports for your industry

```

① Failed login: red border on fields, generic error "Invalid credentials" (no specificity)
② After 5 failures: CAPTCHA appears. After 10: account locked, email sent with unlock link
③ Org selector appears after auth if user belongs to multiple organisations

MODULE B · Executive Dashboard

Real-time OrgOS health monitor. KPIs, alerts, drill-downs, and cross-module activity feed.

FLOW-B1 — Executive Dashboard Daily Review

Actor	Executive / Owner
Time Target	< 2 minutes
Description	Exec opens the platform, reviews KPIs, investigates a cash variance, checks compliance widget, then takes action on a critical alert.

Screen Flow Sequence

Screen ID	Screen Name	Type	Description
SCR-DASH-01	Executive Dashboard	Dashboard	4 KPI cards, revenue chart, compliance widget, risk summary, people widget, activity feed.
SCR-DASH-02	KPI Drill-Down Panel	Slide-Over	Slide-over with full KPI history, breakdown, contributing transactions.
SCR-DASH-03	Alert Centre	List	All active alerts grouped by severity. Acknowledge, assign, dismiss actions.
SCR-FIN-04	P&L Statement	Report	Cross-navigated from revenue KPI drill-down.

SCR-DASH-01 —[Click KPI card]→ **SCR-DASH-02**
SCR-DASH-01 —[Click alert badge]→ **SCR-DASH-03**
SCR-DASH-02 —[View full report]→ **SCR-FIN-04**

③ Entity selector on multi-entity orgs shows consolidated + per-entity views

MODULE D · HR & People Management

Employee lifecycle: hire, onboard, manage, leave, offboard. OrgExec profiles and contracts.

FLOW-D1 — Onboard a New Employee

Actor	HR Manager
Time Target	< 10 minutes
Description	HR Manager initiates new hire, completes wizard across personal details, right-to-work, contracts, benefits, and IT provisioning. Cross-module event cascade fires.

Screen Flow Sequence

Screen ID	Screen Name	Type	Description
SCR-HR-01	People List	List	All employees, contractors, OrgExecs. Status filters. Headcount KPIs.
SCR-HR-02	New Hire Wizard — Step 1	Wizard	Personal info, role, department, start date, employment type.
SCR-HR-03	New Hire Wizard — Step 2	Wizard	Right-to-work documents upload, work authorisation, ID verification.
SCR-HR-04	New Hire Wizard — Step 3	Wizard	Compensation: salary, pay frequency, payroll account, equity.
SCR-HR-05	New Hire Wizard — Step 4	Wizard	Benefits selection, health plan, pension contributions.
SCR-HR-06	New Hire Wizard — Review	Wizard	Summary of all details, ODD contract generation preview, confirm.
SCR-HR-07	Employee Profile	Detail	Complete employee profile with timeline, documents, leave balance, payslips.

```

① Cards draggable between columns — drag triggers status update + customer SMS notification
② ⚠ on READY card: item past due date → amber highlight
③ "Notify" button sends customer pickup-ready SMS/email from template
④ [Move ▸] button opens quick-move dropdown for keyboard-only operation

MODULE H · Operations / ERP

Inventory management, equipment tracking, supply chain orders, and resource planning.

FLOW-H1 — Create & Track a Supply Order

Actor	Operations Manager
Time Target	< 5 business days
Description	Operations manager creates a supply order for cleaning chemicals, tracks vendor fulfilment, and receives stock into inventory.

Screen Flow Sequence

Screen ID	Screen Name	Type	Description
SCR-OPS-01	Inventory Dashboard	Dashboard	Stock levels, low-stock alerts, reorder points, and equipment status.
SCR-OPS-02	Purchase Orders	List	All POs with status: Draft / Submitted / Confirmed / Received / Invoiced.
SCR-OPS-03	New Purchase Order	Form	Vendor selection, line items, quantities, expected delivery date.
SCR-OPS-04	Receive Goods	Form	Match received items to PO, note discrepancies, update inventory.

SCR-OPS-01 Inventory Dashboard

① Installed apps show green ✓ badge and "Manage" button instead of Install
② AI Agent apps have extra permission disclosure — what data they can read/write
③ Industry tab shows curated packs (e.g., Dry Cleaning Pack: all relevant modules bundled)

MODULE J · OrgExec & ODD Management

Manage all OrgExecutors (humans, AI agents, hybrid systems) and their OrgDeviceDriver contracts that define how they operate within the OrgOS.

FLOW-J1 — Define & Deploy an AI Agent OrgExec

Actor	Owner / Admin
Time Target	< 15 minutes
Description	Owner configures a new AI Scheduling Agent with an ODD contract, grants permissions, and deploys it as an active OrgExec.

Screen Flow Sequence

Screen ID	Screen Name	Type	Description
SCR-EXEC-01	OrgExec Registry	List	All OrgExecs: humans, AI agents, hybrid systems, physical devices (OrgCPUs).
SCR-EXEC-02	New OrgExec	Wizard	Type selection, name, role, ODD template assignment.
SCR-EXEC-03	ODD Editor	Form	Define device driver: capabilities, constraints, data access, rate limits.
SCR-EXEC-04	OrgExec Profile	Detail	Live status, task history, performance metrics, ODD compliance log.

SCR-EXEC-01 OrgExec Registry

```

```

① OrgCPUs (machines, IoT devices) appear in same registry as humans and AI — uniform interface
② ODD column shows the contract version governing each executor — click opens ODD Editor
③ AI Agent row shows live CPU usage in parent OrgOS Control Panel

SCR-EXEC-03 ODD Editor — AI Scheduling Agent

```
┌──────────────────────────────────────────────────────────────────────────────────┐
│ ▌ ume   │ OrgSystem / ODDs / AI-SCH-1 v1.0                    [ Save ] [ Deploy ]  │
└──────────────────────────────────────────────────────────────────────────────────┘
```

```
OrgDeviceDriver:  AI Scheduling Agent  (AI-SCH-1 v1.0)
──────────────────────────────────────────────────────────────────────────────

IDENTITY
Name: UME Scheduling Agent          Type: AI Agent  (LLM-powered)
Description: Autonomous agent that optimises staff scheduling and
order routing across the Operations and HR modules.

CAPABILITIES (what this OrgExec CAN do)
☑ Read: Order queue, staff availability, equipment status
☑ Write: Create/update schedule assignments
☑ Notify: Send staff shift reminders via email/SMS
☐ Write: Modify financial records  (disabled)
☐ Access: Customer payment data  (disabled)

CONSTRAINTS (boundaries this OrgExec must respect)
Max task executions per hour:    200
Working hours only:              ☑  Mon-Sun 06:00-22:00
Require human approval for:      Schedule changes > 3 staff / shift
Escalate to human if:            Conflicting rules cannot be resolved

AUDIT
All agent actions logged:  ☑ Yes   Retention: 12 months
Agent transparency log:    [ View action history ]

            [ ◄ Back ]   [ Test Agent ]          [ Deploy OrgExec ──► ]
```

① ODD is the formal contract between this OrgExec and the OrgOS — governs all interactions
② Capability checkboxes control data access permissions at the OrgKernel level
③ Constraints define operating boundaries — violated constraints raise ODD compliance alerts
④ "Test Agent" runs the agent in sandbox mode against sample data before live deploy

MODULE K · DAO & Distributed Ledger (DLT)

Form and manage Decentralised Autonomous Organisations, inter-organisation smart contracts, distributed ledger transactions, and franchise networks.

FLOW-K1 — Form a DAO for a Franchise Network

Actor	Owner / DAO Founder
Time Target	< 30 minutes
Description	Bob and Alice formalise their franchise network as a DAO: define the parent org, invite franchisee organisations, publish the OrgDNA brand package, and deploy smart contract governance.

Screen Flow Sequence

Screen ID	Screen Name	Type	Description
SCR-DAO-01	DAO Overview	Dashboard	Active DAOs, member organisations, ledger activity, treasury balances.
SCR-DAO-02	Create DAO Wizard	Wizard	DAO type, governance model, member invite, smart contract templates.
SCR-DAO-03	Smart Contract Editor	Form	Define inter-org contracts: royalties, brand standards, profit sharing.
SCR-DAO-04	OrgDNA Publisher	Form	Package and publish the parent OrgDNA for franchisees to clone.
SCR-DAO-05	DAO Member Network	Graph	Visual map of all member orgs, their status, and inter-org flows.
SCR-DAO-06	DLT Ledger Viewer	List	All inter-organisation transactions on the distributed ledger.

SCR-DAO-01 —[+ Form DAO]→ **SCR-DAO-02**
SCR-DAO-02 —[Define governance]→ **SCR-DAO-03**
SCR-DAO-03 —[Publish OrgDNA]→ **SCR-DAO-04**
SCR-DAO-04 —[Invite members]→ **SCR-DAO-05**

│           |                                                                            |
│           | Member Organisations                                                       |
│           |  ┌──────────────────────────────────────────────────────────────────────┐|
│           |  | 🏢 Bob's Dry Cleaning (Parent)  ●Active  St. Louis MO   Founder      |
│           |  | 🏢 Clean Express KC             ●Active  Kansas City MO  Franchisee  |
│           |  | 🏢 Fresh Press Columbia         ●Active  Columbia MO     Franchisee  |
```

```
🏢 QuickClean Springfield        ●Active   Springfield MO   Franchisee
🏢 Midwest Clean Co.             ⚠ Review  Jefferson City   Pending

Recent Ledger Activity:
● Nov 28 Royalty payment: Clean Express KC → Parent  $1,200 ✓
● Nov 25 Brand OrgDNA update v1.4 deployed to all members
```

① Each member org is an independent UME OrgOS — DAO connects them via smart contracts
② Royalty payments executed automatically by smart contract on each franchisee's revenue cycle
③ OrgDNA updates: parent publishes new brand package → all members notified → can accept/review
④ Pending member: their franchise agreement smart contract awaiting multi-sig approval

SCR-DAO-03 Smart Contract Editor

```
▌ ume  | DAO / Smart Contracts / Franchise Agreement v2.0   [ Save ] [ Deploy ]

Smart Contract:  Franchise Agreement  v2.0
Parties:  BobAlice Franchise Group (Parent)  ↔  All Franchisee Members

CONTRACT TERMS  (visual builder — no code required)

ROYALTIES
 Trigger:   Monthly revenue posted in franchisee Finance module
 Rate:      6% of gross monthly revenue
 Transfer:  Auto-debit franchisee treasury → parent treasury
 Ledger:    Record on DLT as ROYALTY_PAYMENT

BRAND STANDARDS
 OrgDNA version:  Must be within 1 major version of parent
 On breach:       Warning → 30-day cure period → membership suspended

GOVERNANCE
 Decisions: Majority vote (>50%)  Quorum: 4 of 7 members
 Voting period: 7 days   Emergency: 24 hours (>75% required)

[ + Add Clause ]  [ Preview Legal Text ]  [ Request Legal Review ]

            [ ◂ Back ]                        [ Deploy Contract ──▸ ]
```

① Visual contract builder generates legally-informed smart contract without code knowledge
② "Preview Legal Text" shows the human-readable contract document for legal review
③ Deploy writes contract to DLT — immutable, requires multi-sig from all parties

SCR-DAO-06 DLT Ledger Viewer

```

[Click any row to verify hash and view full transaction detail]

Ledger Stats: 10,842 blocks · Consensus: 7/7 nodes · ✓ Healthy

① Every inter-org transaction recorded on immutable DLT — royalties, OrgDNA updates, votes
② Block detail shows transaction hash, all signatories, and timestamp — full audit trail
③ Consensus indicator: all 7 member nodes must agree — shows real-time agreement status

MODULE L · Digital Twin — Software Defined Organisation (SDO)

The SDO view is the meta-representation of the entire organisation as a living system. Visualise all running components, data flows, and organisational health in one unified view.

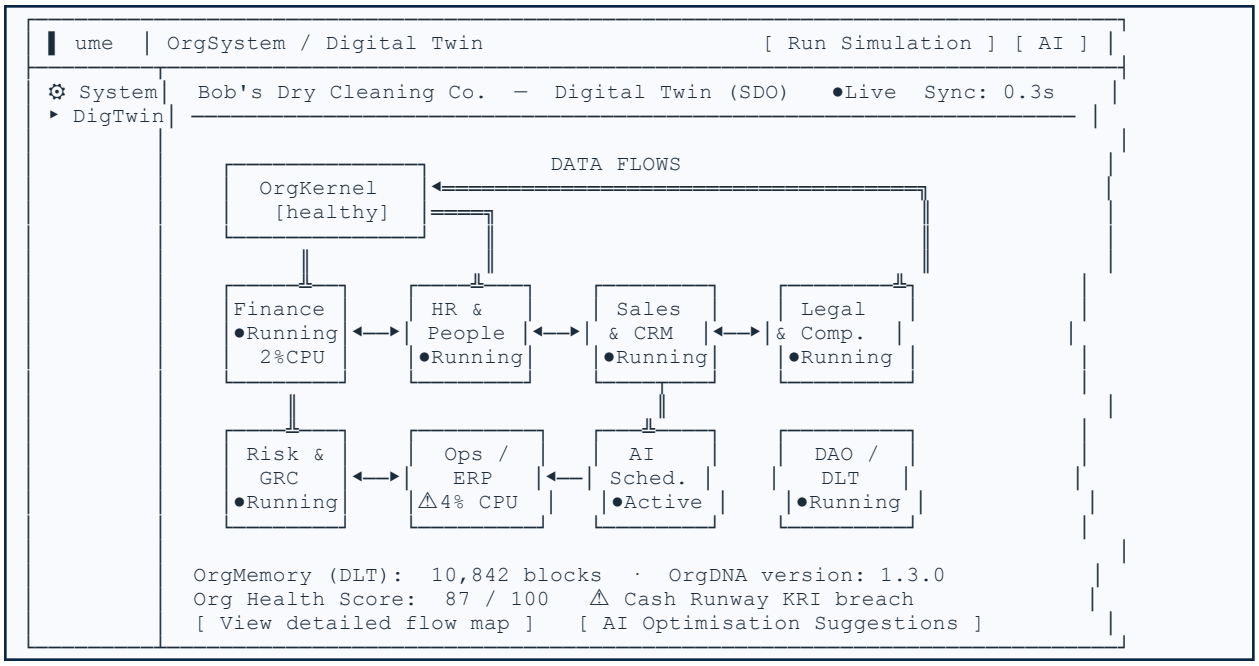
FLOW-L1 — View & Optimise the Organisational Digital Twin

Actor	Owner / Executive
Time Target	< 5 minutes
Description	Owner opens the SDO view, sees the full organisational topology, identifies a bottleneck in the order fulfilment flow, and launches an AI optimisation run.

Screen Flow Sequence

Screen ID	Screen Name	Type	Description
SCR-SDO-01	SDO Overview	Dashboard	High-level org topology: modules, data flows, health indicators.
SCR-SDO-02	Flow Map	Diagram	Interactive diagram of all OrgApp data flows and dependencies.
SCR-SDO-03	SDO Analytics	Report	Org simulation: run what-if scenarios, optimisation suggestions.

SCR-SDO-01 Software Defined Organisation (SDO) — Overview



① SDO is the live digital twin — every module shows real-time CPU, health, and data flow status
② Data flow arrows represent inter-module event streams — click to see message volume
③ "AI Optimisation" runs the org through an LLM-powered simulation to identify improvements
④ OrgMemory (DLT) tracks immutable history of all inter-module and inter-org transactions

MODULE M · Settings & Administration

User roles, permissions, integrations, audit log, billing, and OrgOS configuration.

FLOW-M1 — User & Role Management

Actor	System Administrator
Time Target	< 10 minutes
Description	Admin reviews users, creates a new custom role with scoped permissions, and assigns it to a new employee.

Screen Flow Sequence

Screen ID	Screen Name	Type	Description
SCR-SET-01	Settings Hub	Dashboard	All settings categories in one view. Quick links to common tasks.
SCR-SET-02	User & Role Management	List	All users, roles, invitations, and activity log.
SCR-SET-03	Role Editor	Form	Define role name, module permissions (read/write/admin), custom constraints.
SCR-SET-04	Integration Settings	List	Connected third-party apps (Stripe, Monday, QuickBooks, etc.).
SCR-SET-05	Billing & Subscription	Detail	Current plan, usage metrics, invoice history, upgrade path.

SCR-SET-02 User & Role Management

└──────────┴───────────────────────────────────────────────────────────────────┘
```

① "+ Create Role" opens SCR-SET-03 Role Editor — granular per-module permissions
② Activity Log tab: full audit of all settings changes with user, timestamp, before/after values
③ Invite: sends email with join link; pending invites show in Invitations tab with expiry

MODULE N · Work Board & Employee Portal

Task management, sprint boards, employee self-service portal, and leave requests.

FLOW-N1 — Employee Leave Request & Approval

Actor	Employee → Manager
Time Target	< 24 hours
Description	Employee submits a leave request via portal, manager receives notification, reviews and approves. Leave balance auto-updated.

Screen Flow Sequence

Screen ID	Screen Name	Type	Description
SCR-PRT-01	Employee Portal — Home	Dashboard	My tasks, upcoming shifts, leave balance, announcements, payslips.
SCR-PRT-02	Request Leave	Form	Leave type, date range, reason. Shows current balance impact.
SCR-HR-08	Manager Leave Inbox	List	Pending leave requests for team members. Approve / Decline.
SCR-PRT-03	Leave Calendar	Calendar	Team leave calendar view. Approved and pending leaves.

SCR-PRT-01 —[[Request Leave]]→ **SCR-PRT-02**
SCR-PRT-02 —[Submit → manager notified]→ **SCR-HR-08**
SCR-HR-08 —[Approve → calendar updated]→ **SCR-PRT-03**

──────────────────────────────────────────────────────────────────────

Good morning, Marcus ☀   Week of Nov 25–Nov 29, 2024
──────────────────────────────────────────────────────────────────────

My Schedule This Week                  Leave Balances
                                       Annual Leave:      12.5 days
Mon  ▓▓▓  8am–4pm                      Sick Leave:         8.0 days
Tue  ▓▓▓  8am–4pm                      [ Request Leave ]
Wed  ───  Day off
Thu  ▓▓▓  8am–4pm                      Recent Payslips
Fri  ▓▓▓  8am–4pm                      Nov 15  $1,110.00  [ View ] [ Download ]
                                       Oct 31  $1,110.00  [ View ] [ Download ]

My Tasks Today
☐ Open shop — 8:00 AM                  Announcements
☐ Process Sat drop-offs                📣 Dec 5: Staff holiday party RSVP by Dec 1
☐ Inventory count — noon               📣 New: AI Scheduling Agent now managing shifts
☑ Signed new H&S docs
```

① Employee sees only their own data — portal is scoped by role (Staff ODD)

② Schedule pulled from Operations module — AI Scheduling Agent manages assignments
③ Tasks linked to Work Board (SCR-WRK-01) — check-off here reflects there

SCR-WRK-01 Work Board — Sprint Kanban

└──────────┴──────────────────────────────────────────────────────────────────────────────┘
```

① WIP limit shown on column header — exceeding limit highlights column red
② Overdue task shows ⚠ TODAY badge in red — manager notified if still in progress
③ Cards draggable — dropping into DONE creates completion audit entry

MODULE O · Marketing

Campaign management, micro-persona builder, social media content generation, and performance analytics.

FLOW-O1 — Generate a Social Media Campaign

Actor	Owner / Marketing
Time Target	< 15 minutes
Description	Owner uses the AI marketing assistant to generate social posts and campaign ideas targeted to dry cleaning micro-personas.

Screen Flow Sequence

Screen ID	Screen Name	Type	Description
SCR-MKT-01	Marketing Dashboard	Dashboard	Campaign KPIs, active campaigns, audience summary, content calendar.
SCR-MKT-02	Micro-Persona Builder	Form	Define target customer segments, demographics, behaviours, pain points.
SCR-MKT-03	AI Campaign Generator	AI Tool	Input persona + goal → AI generates posts, hashtags, taglines, campaign brief.
SCR-MKT-04	Content Calendar	Calendar	Schedule generated posts. Connect social accounts. Track engagement.

SCR-MKT-03 AI Campaign Generator

```
▌ ume  | Marketing / AI Campaign Generator

🤖 AI Campaign Generator
Target Persona:  [ Busy Professional — St. Louis Metro ▼ ]  [ + New Persona ]
Campaign Goal:   [ Drive new customer walk-ins           ▼ ]
Brand Tone:      [ Professional yet approachable         ▼ ]
Channels:        ☑ Instagram   ☑ Facebook   ☐ TikTok   ☐ Twitter/X

[ ✨ Generate Campaign Content ]

Generated Content:                                    [ Regenerate ]

📸 Instagram Post 1:
"Life is too short for wrinkled suits. We turn rushed morning into
 boardroom ready — same-day service available. Drop off before 9AM,
 pick up by 5PM. 📍 [Your Location]"
#DryCleaning #StLouis #SameDayService #BusinessReady

📘 Facebook Post:
"Don't let a stain derail your week. Bob's Dry Cleaning offers..."

💡 Campaign Tagline: "Always Boardroom Ready."

[ ✓ Approve & Schedule ]  [ Edit ]  [ Save to Content Library ]
```

① Micro-personas built from CRM customer data + market research — fed to AI as context
② Generated content uses brand voice, business name, and location automatically from OrgDNA

③ "Approve & Schedule" pushes posts to SCR-MKT-04 Content Calendar for review before publish
