UME

Organization / Business Operating System

Expanded Users, Workflows & Use Cases

Entrepreneurs · Independent Workers · Employees · Employers
All Organization Sizes · All Life Stages · All Legal Structures

---

Document ID: UME-WUC-002
Version: 1.0.0
Status: Draft — Expanded Edition
Date: March 2026
Coverage: Individuals, SME, Mid-Market, Enterprise, Government, NGO, Global
Org Types: Sole Proprietorships, Partnerships, Corporations, Cooperatives, Non-Profits, For-Profits, Investment Funds, Banks, Academia, Institutes, Training Facilities, Governments, International Organizations, Global Supply Chains

Document Structure

This document is organized into six parts plus appendices. Navigate directly to the part and section relevant to your organizational context.

Part	Title	Pages Coverage
Introduction	Purpose, scope, and how to use this document	All readers
Part A	Individual Workers: Entrepreneurs, Independents, Employees & Employers	IND-01 to IND-10
Part B	Workflows by Organization Legal Structure	Sole Prop → Bank → Academia
Part C	Organization Life-Stage Workflows	Idea to Mature
Part D	Sector-Specific Workflows	Gov, NGO, Healthcare, Professional Services
Part E	Global, Multi-Entity & International Workflows	MNE, INGO, Global Supply Chain
Part F	Extended User Journey Maps	5 detailed journeys
Appendix A	Persona Quick Reference Index	All 15 personas
Appendix B	Workflow Index by Organization Type	All 29 workflows
Appendix C	Use Case Index	All 17 use cases
Appendix D	Module Coverage Matrix by Org Type	9 org types × 17 modules

Key Personas Covered

IND-01 Solo Entrepreneur / Founder
IND-02 Serial / Multi-Venture Founder
IND-03 Freelance Consultant / Independent Worker
IND-04 Gig Economy Worker
IND-05 Front-Line Employee
IND-06 Mid-Level Knowledge Worker
IND-07 Remote / Distributed Worker
IND-08 Small Business Owner / Micro-Employer
IND-09 Mid-Market Employer (no HR team)
IND-10 Large Employer
ORG-NPO-01 Non-Profit Executive Director
ORG-INV-01 Fund Manager / General Partner
ORG-BNK-01 Bank Business Unit Manager
GOV-01 Government Department Head
NGO-01 INGO Country Director

Org Types Covered

Sole Proprietorships & Sole Traders
Partnerships (General, Limited, LLP)
Private & Public Corporations
Cooperatives (Consumer, Worker, Multi-Stakeholder)
Non-Profits, Charities & Foundations
For-Profit Businesses (All Sizes)
Investment Funds (VC, PE, Hedge, Family)
Banks & Financial Services Institutions
Universities, Colleges & Academia
Institutes, Centers & Research Organizations
Training Facilities & Professional Dev.
Government Departments & Public Bodies
International Organizations & INGOs
Global Supply Chains & Trade Operations
Healthcare Organizations
Professional Services Firms

Introduction

This document covers users, workflows, and use cases for the UME Organization Operating System across every type of worker, organization size, lifecycle stage, and legal structure. It is organized into five parts:

- Part A — Individual Workers: Entrepreneurs, Independents, Employees & Employers
- Part B — Business Types by Legal Structure & Mission
- Part C — Organization Life Stage Workflows
- Part D — Sector-Specific Workflows (Government, Academia, Banking, NGOs, etc.)
- Part E — Global, Multi-Entity & International Organization Workflows

How to Use This Document

Each section contains: Persona profiles, End-to-end workflows (step tables), Use cases (structured with actors/trigger/flow/outcomes), and Journey maps.
Personas reference UME module numbers (01–42) from the Design & Architecture document.
Workflows show who does what, in which module, and what the system produces.
Use cases are formal and reusable across org types where marked "All".

Part A: Individual Workers — Entrepreneurs, Independents, Employees & Employers

UME serves individuals as the primary unit of work across every organizational context. Whether someone is a solo founder bootstrapping a startup, a freelance consultant running a one-person operation, a front-line employee, or a multi-entity employer, the UME OS adapts to their scope and role.

A.1 The Entrepreneur

Persona	IND-01 — Solo Entrepreneur / Founder (Pre-Revenue)
Org Context	Startup — 1 person, idea-to-product stage
Scale	1 person, $0–$500K funding
Description	Building a product or service from scratch. Wearing every hat: strategy, product, sales, finance, legal, and operations. Time is the scarcest resource.
Key Modules	Strategy (21), Product (30), Finance (14), Legal Entity (13), Sales (34), Work (40)
Goals	Validate product-market fit; close first paying customers; stay legally compliant; extend runway
Challenges	No team to delegate to; admin overhead eats build time; compliance requirements feel overwhelming
UME Value	UME acts as a virtual co-founder OS: single dashboard for strategy, finance, legal status, and pipeline

Persona	IND-02 — Serial Entrepreneur / Multi-Venture Founder
Org Context	Holding structure — 3–10 portfolio ventures
Scale	Multi-entity, $1M–$50M total AUM
Description	Running multiple ventures simultaneously through a holding entity. Needs consolidated visibility across legal entities, capital allocation, and leadership teams.
Key Modules	Legal Entity (13), Investment (17), Analytics (02), Finance (14), Board (04), Portfolio (27)
Goals	Allocate capital to highest-ROI ventures; stay on top of statutory obligations; manage boards
Challenges	Entity proliferation; compliance tracking across jurisdictions; cash flow coordination across ventures
UME Value	UME Chombo tracks all entities; Investment Module governs capital allocation; consolidated dashboard

Workflow: Entrepreneur Launches a New Venture (Solo Founder)

From business idea through legal registration, first product version, and first paying customer — all within UME.

#	Actor	Action	Module	Output / Outcome
1	**Founder (IND-01)**	Create organization in UME; define vision, mission, strategic pillars	*Strategy (21)*	Org bootstrapped; strategy architecture initialized
2	**Founder**	Register legal entity: company type, jurisdiction, registration number	*Legal Entity (13)*	Entity registered; Chombo runs 45-policy compliance evaluation

3	**Chombo (auto)**	Generate filing schedule for new entity; emit upcoming deadlines	*Legal Entity (13)*	Statutory filing calendar live; alerts scheduled
4	**Founder**	Set up chart of accounts; open-balance bank account record	*Finance (14)*	COA configured; treasury account registered
5	**Founder**	Define MVP feature backlog; create product record and roadmap	*Product (30) + Work (40)*	Product catalog entry; work items backlog created
6	**Founder**	Build MVP; track work items daily on kanban board	*Work (40)*	Sprint velocity tracked; features delivered iteratively
7	**Founder**	Define go-to-market: register first campaign with audience persona	*Marketing (22)*	Campaign registered; 70 Soko strategy packs evaluated
8	**Founder**	Add first prospects to CRM; log outreach activities	*CRM (08) + Sales (34)*	Pipeline created; activity log started
9	**Founder**	Close first customer; create contract and invoice	*Sales (34) + Finance (14)*	Opportunity closed-won; invoice issued; revenue journal posted
10	**Founder**	Review weekly dashboard: OKRs, cash runway, pipeline, filings	*Portal (26) + Analytics (02)*	Single-screen situational awareness; founder makes informed decisions

UC-IND-01 Sole Founder Manages Cash Runway

Actors	Trigger	Applies To	Modules
Founder (IND-01)	Monthly review of financial position	Startup / Sole Trader / Partnership	Finance (14), Analytics (02), Sales (34), Investment (17)

Preconditions

- Bank account and chart of accounts configured
- Revenue and expense transactions posted

Main Success Flow

1. Founder opens Finance Module; reviews cash position vs monthly burn rate.
2. Finance Module computes implied runway (months = cash ÷ monthly burn).
3. Analytics Module surfaces runway trend: improving, stable, or deteriorating.
4. Founder reviews AR aging: identifies overdue invoices; triggers dunning.
5. Founder reviews pipeline value: estimates near-term cash inflows.
6. Finance Module generates 13-week cash flow forecast.
7. If runway < 6 months: alert emitted; Founder reviews cost structure.
8. Founder logs any capital raise activities as investment pipeline in Investment Module.

Alternative / Exception Flows

- Runway drops below 3 months: escalation alert to any registered board members.

Postconditions

- Cash position understood; dunning initiated; forecast updated

A.2 The Independent Worker (Freelancer / Contractor / Consultant)

Persona	IND-03 — Freelance Professional / Independent Consultant
Org Context	Sole proprietorship or single-member LLC
Scale	1 person, project-based revenue
Description	Delivers specialized professional services to multiple clients simultaneously. Manages proposals, contracts, time billing, invoices, and client relationships independently.
Key Modules	CRM (08), Finance (14), Work (40), Schedule (35), Templates (39), Legal Entity (13)
Goals	Keep client pipeline full; bill accurately; get paid on time; protect IP via contracts
Challenges	Invoice chasing; managing multiple client contexts simultaneously; time tracking discipline
UME Value	CRM tracks every client relationship; Finance handles proposals→invoices→payments; Work tracks billable hours

Persona	IND-04 — Gig Economy Worker / Platform Independent
Org Context	No legal entity; individual worker
Scale	1 person, gig-by-gig
Description	Works across multiple platforms and clients for short-duration engagements. Needs to track income streams, manage taxes, and build a personal brand.
Key Modules	Finance (14), Analytics (02), CRM (08), Work (40), Knowledge (19)
Goals	Maximize billable utilization; understand net income after platform fees; manage estimated taxes
Challenges	Income unpredictability; tax complexity; reputation management across platforms
UME Value	Finance Module aggregates income streams; Analytics surfaces utilization and income trends

Workflow: Independent Consultant — Proposal to Paid Invoice

#	Actor	Action	Module	Output / Outcome
1	**Consultant (IND-03)**	Log new client lead in CRM; schedule discovery call	*CRM (08) + Schedule (35)*	Stakeholder record created; discovery call on calendar
2	**Consultant**	Discovery call completed; outcome and requirements noted	*CRM (08)*	Interaction logged; requirements sketched in Work Module
3	**Consultant**	Draft proposal using proposal template	*Templates (39)*	Branded proposal rendered with scope, timeline, fees
4	**Consultant**	Send proposal; log as CRM interaction	*CRM (08) + Communications (07)*	Proposal emailed; delivery tracked
5	**Client**	Accepts proposal; Consultant creates project and contract	*Sales (34) + CRM (08)*	Opportunity closed-won; contract record created
6	**Consultant**	Kick off project; create work items and time log	*Work (40)*	Billable task list created; time tracking active
7	**Consultant**	Log daily time against work items throughout engagement	*Work (40)*	Billable hours accumulated; utilization tracked
8	**Consultant**	At billing milestone: generate invoice from time log	*Finance (14) + Templates (39)*	Invoice rendered with itemized hours; sent to client
9	**Finance (auto)**	Monitor payment; trigger dunning if overdue	*Finance (14)*	Payment status tracked; reminder sent at configured intervals

10	**Consultant**	Payment received; record in Finance; update CRM health score	*Finance (14) + CRM (08)*	Journal posted; AR cleared; client relationship score updated

UC-IND-02 Independent Worker Manages Multi-Client Workload

Actors	Trigger	Applies To	Modules
Freelancer (IND-03 / IND-04)	Start of new week; need to prioritize across 3 active client engagements	Sole Proprietorship / Independent	Work (40), Schedule (35), Analytics (02), Finance (14), CRM (08)

Preconditions

- Work items created per client engagement
- Time tracking configured
- Client records in CRM

Main Success Flow

9. Worker opens Work Module; views kanban board filtered by active client engagements.
10. Work Module shows total open items, WIP count, and blocked items per client.
11. Worker checks utilization: time logged this week vs target billable hours.
12. Worker rebalances priorities: drags items between columns; updates due dates.
13. Schedule Module checked for client meetings and deadlines this week.
14. Analytics Module shows revenue-per-client this month: worker de-prioritizes low-margin work.
15. Worker adds time logs for completed tasks; billable hours accumulate.
16. At week-end: worker reviews summary; identifies under-utilized capacity for prospecting.

Alternative / Exception Flows

- Over-committed: worker flags client about scope creep; change request created.

Postconditions

- Priorities set; time logged; utilization visible; prospecting capacity identified

A.3 The Employee

Persona	IND-05 — Front-Line / Entry-Level Employee
Org Context	Any organization type and size
Scale	Individual contributor, salaried or hourly
Description	Executes day-to-day tasks; needs to understand their role, access information, complete training, manage leave, and track their own goals.
Key Modules	Portal (26), Work (40), HR (16), Learning (20), Knowledge (19), Schedule (35)
Goals	Do excellent work; grow skills; understand performance expectations; navigate org processes easily
Challenges	Information overload; unclear priorities; manual processes for HR and leave; learning hard to find

UME Value	UME Portal is single front door: notifications, tasks, learning, HR self-service — all in one place

Persona	IND-06 — Mid-Level Professional / Knowledge Worker
Org Context	Corporate, professional services, tech, finance
Scale	"Manager of self"; contributor and informal leader
Description	Balances independent project work with team coordination. Cares about career development, cross-functional collaboration, and personal OKR progress.
Key Modules	Portal (26), Work (40), Strategy (21), Learning (20), Knowledge (19), Analytics (02)
Goals	Deliver high-impact work; build expertise; influence cross-functional outcomes; advance career
Challenges	Context-switching costs; knowledge buried in email; no visibility into how personal OKRs ladder up
UME Value	OKR cascade makes personal impact visible; Knowledge Module surfaces expertise; Analytics tracks progress

Persona	IND-07 — Remote / Distributed Worker
Org Context	Any organization; fully or partially remote team
Scale	Individual or part of distributed team
Description	Works asynchronously across time zones. Needs strong async communication tools, accessible documentation, and visibility into shared work without live meetings.
Key Modules	Portal (26), Work (40), Knowledge (19), Communications (07), Schedule (35), Teams (38)
Goals	Stay aligned with team without meeting fatigue; contribute asynchronously; never miss context
Challenges	Time zone coordination; information siloed in chat tools; unclear ownership of async tasks
UME Value	Work Module + Knowledge Module + async-first Communications replaces meeting-heavy culture

Workflow: Employee Submits and Tracks a Leave Request

#	Actor	Action	Module	Output / Outcome
1	**Employee (IND-05)**	Open HR self-service in portal; select Leave Request	*Portal (26) + HR (16)*	Leave form pre-filled with leave balance and type options
2	**Employee**	Select leave type, dates; check calendar for team conflicts	*HR (16) + Schedule (35)*	Conflict check run; no clashes found; request submitted
3	**Process (auto)**	Route leave request to line manager for approval	*Process (29)*	Approval task created in manager's Work Module inbox
4	**Line Manager**	Review request; check team capacity; approve or decline	*Work (40) + HR (16)*	Leave approved; employee and calendar notified
5	**HR Module (auto)**	Update leave balance; block dates in enterprise calendar	*HR (16) + Schedule (35)*	Leave balance decremented; out-of-office event created
6	**Employee**	Receives confirmation in portal notification center	*Portal (26)*	Notification read; leave confirmed and visible in personal calendar

UC-IND-03
Employee Completes

Mandatory Compliance Training			
Actors	**Trigger**	**Applies To**	**Modules**
Employee (IND-05 / IND-06)	New compliance training assigned on joining or policy update	All — particularly regulated industries	Learning (20), HR (16), Portal (26), Communications (07)

Preconditions

- Employee record active in HR Module
- Compliance training content published in Learning Module

Main Success Flow

17. HR Module assigns compliance training; enrollment created with deadline.
18. Employee receives portal notification: "Mandatory training due in 14 days."
19. Employee opens learning portal; sees compliance training tile with progress bar.
20. Employee completes modules; quiz scores auto-recorded.
21. Certificate issued on 100% completion; CPD points logged.
22. HR Module marks compliance training as satisfied; audit record written.
23. If deadline approaching without completion: escalation notification sent to manager and HR.

Alternative / Exception Flows

- Failed quiz (below pass mark): retake immediately available; max attempts configurable.
- Content outdated: Learning Manager publishes updated version; re-enrollment auto-triggered.

Postconditions

- Training completed; certificate issued; compliance record updated; hr.review satisfied

A.4 The Employer

Persona	IND-08 — Small Business Owner / Micro-Employer
Org Context	SME — 1–19 employees
Scale	Owner-operator, wears management and execution hats
Description	Runs a small business and employs a small team. Manages hiring, payroll, performance, and compliance personally alongside running operations and serving customers.
Key Modules	HR (16), Finance (14), Legal Entity (13), Work (40), CRM (08), Schedule (35)
Goals	Keep payroll accurate; stay compliant with employment law; retain good staff; serve customers well
Challenges	Admin overhead of employment compliance; payroll errors; time spent on non-revenue-generating tasks
UME Value	UME automates payroll, leave, onboarding workflows — owner focuses on the business, not admin

Persona	IND-09 — Mid-Market Employer / HR-Less Organization
Org Context	50–250 employees; no dedicated HR team

Scale	Owner / ops manager handles people function
Description	Employs a significant team but has not yet hired a dedicated HR professional. Employment law complexity is growing. Performance management is ad hoc.
Key Modules	HR (16), Learning (20), GRC (15), Finance (14), Work (40), Analytics (02)
Goals	Structure the people function; run fair reviews; understand headcount cost; reduce turnover
Challenges	No systematic performance management; compliance gaps (employment law); payroll scaling pain
UME Value	HR Module provides enterprise-grade people management without needing a dedicated HRIS team

Persona	IND-10 — Large Employer / Workforce-Heavy Organization
Org Context	1000+ employees; multi-site
Scale	CHRO + HR team managing complex workforce
Description	Manages a large, complex workforce across multiple locations. Needs workforce planning, succession management, detailed analytics, and compliance across jurisdictions.
Key Modules	HR (16), Analytics (02), Learning (20), GRC (15), Finance (14), Operations (25)
Goals	Workforce planning accuracy; reduce unwanted attrition; succession depth; cross-jurisdiction compliance
Challenges	People data fragmented; succession gaps invisible; global employment law variation
UME Value	HR Module + Analytics provides predictive workforce intelligence; GRC maps employment obligations by jurisdiction

Workflow: Small Business Owner Runs Monthly Payroll

#	Actor	Action	Module	Output / Outcome
1	**Owner (IND-08)**	Open HR Module; initiate monthly payroll for the period	*HR (16)*	Payroll computation initiated for active employees
2	**HR Module (auto)**	Calculate gross pay from employment records and time logs	*HR (16) + Work (40)*	Gross pay per employee computed; overtime flagged
3	**HR Module (auto)**	Apply statutory deductions: income tax, social contributions	*HR (16)*	Net pay computed; deduction breakdown per employee
4	**Owner**	Review payroll run; check for anomalies; approve	*HR (16)*	Payroll approved; pay slips generated from template
5	**Finance Module (auto)**	Post payroll journal entries to general ledger	*Finance (14)*	Wage expense posted; liability accounts updated
6	**Communications (auto)**	Distribute pay slips to employees via secure portal	*Communications (07) + Templates (39)*	Pay slips delivered; audit record of distribution created
7	**Finance Module (auto)**	Generate bank payment file for net pay transfer	*Finance (14)*	Bank file ready for upload to banking portal
8	**Owner**	Upload bank file; confirm payroll funded; log in Finance	*Finance (14)*	Cash journal posted; AR/AP cleared; payroll period closed

UC-IND-04
Employer Hires First Employee

Actors	Trigger	Applies To	Modules

Owner / Manager (IND-08)	Business growth requires first hire	Sole Proprietorship, Startup, SME	HR (16), Finance (14), Learning (20), CMS (06), Templates (39), Communications (07)

Preconditions

- Legal entity registered; employer registration completed in jurisdiction
- HR Module active; org unit created

Main Success Flow

24. Owner creates job requisition in HR Module: title, org unit, salary range, start date.
25. Job posted to recruitment channels (via Communications Module).
26. Applications received; candidates logged in HR Module with tracking.
27. Owner conducts interviews; records scores and notes against each candidate.
28. Selected candidate: offer generated from offer letter template.
29. Offer accepted: candidate converted to employee record; onboarding workflow starts.
30. IT provisioning, facility access, payroll enrollment, and compliance training all triggered.
31. Employment contract stored in CMS Module; signed copy attached.
32. Employee appears on payroll for first pay run.

Alternative / Exception Flows

- Candidate declines offer: second candidate activated from pipeline.
- Probation period: performance review triggered at probation end date.

Postconditions

- Employee active; payroll enrolled; compliance training assigned; onboarding complete

Part B: Workflows by Organization Type & Legal Structure

Different legal structures and mission types create distinct operational patterns, compliance requirements, and user needs. This section covers each major organizational type with tailored personas, workflows, and use cases.

B.1 Sole Proprietorship & Single-Member Entity

One owner, unlimited personal liability, simple tax treatment. Most common globally. Ranges from market stall to $10M+ professional practice.

Sole proprietors are the most common UME user type globally. The platform serves them as a personal business operating system — strategy, finance, compliance, and client management in one tool with minimal configuration overhead.

Characteristic	Sole Proprietorship in UME
Legal Entity Count	1 — often no formal entity; UME tracks as informal trading name
Payroll Scope	Owner-only or 1–5 staff; HR Module at lightweight configuration
Finance Complexity	Single COA; simple P&L; GST/VAT self-management
Compliance Needs	Tax filing, business license, professional body renewals
Key Workflows	Client billing, expense management, tax estimation, contract management

Workflow B.1.1: Annual Tax Preparation (Sole Proprietor)

#	Actor	Action	Module	Output / Outcome
1	**Owner**	Open Finance Module; lock prior year period	*Finance (14)*	Period locked; transactions frozen for year-end
2	**Finance (auto)**	Categorize all transactions against tax categories	*Finance (14)*	Revenue, allowable expenses, and non-allowable items classified
3	**Owner**	Review categorizations; correct any miscoded items	*Finance (14)*	Transaction coding confirmed; tax profit computed
4	**Finance (auto)**	Generate profit and loss statement for the tax year	*Finance (14)*	P&L generated; taxable profit figure produced
5	**Legal Entity (auto)**	Check upcoming tax filing deadline; emit reminder	*Legal Entity (13)*	Filing deadline confirmed; calendar alert set
6	**Owner**	Export tax workings to accountant or complete self-assessment	*Finance (14) + Templates (39)*	Tax summary report distributed or filed directly
7	**Owner**	Record tax payment in Finance Module	*Finance (14)*	Tax liability journal cleared; cash reduced

B.2 Partnership (General, Limited & LLP)

Two or more partners sharing ownership, profit, and (in general partnerships) liability. Common in professional services, law, medicine, and consulting.

Partnerships have unique governance requirements: partner capital accounts, profit-sharing arrangements, partner admission/exit workflows, and partnership agreement compliance.

Characteristic	Partnership in UME
Legal Entity	1 partnership entity (or LLP); tracked in Legal Entity Module
Key Unique Data	Partner capital accounts, profit-sharing ratios, partnership deed terms

Governance	Partnership meeting minutes (via Board Module for formal meetings), voting records
Finance Special Case	Partner drawings vs salary; profit allocation; capital account movements
Compliance	Annual accounts filing, partnership tax return, PSC register (UK), beneficial ownership

Workflow B.2.1: Admit a New Partner

#	Actor	Action	Module	Output / Outcome
1	**Managing Partner**	Propose new partner admission; create board/partners meeting agenda item	*Board (04)*	Meeting scheduled; admission proposal circulated to existing partners
2	**Legal Officer**	Prepare amended partnership deed from template	*Templates (39) + CMS (06)*	Draft deed created; track-changes version for partner review
3	**Partners**	Vote on admission at partners meeting; resolution recorded	*Board (04)*	Admission resolution passed; vote recorded
4	**Finance Manager**	Create new partner capital account; record initial capital contribution	*Finance (14)*	Capital account journal posted; partnership equity updated
5	**Legal Officer**	Execute and store amended partnership deed in CMS	*CMS (06)*	Signed deed stored; version history maintained
6	**HR Module**	Create employee/partner record; assign portal access and permissions	*HR (16) + Security (36)*	New partner can access UME with partner-level RBAC role
7	**Finance Module (auto)**	Update profit-sharing ratio; apply from effective date	*Finance (14)*	Future P&L allocations reflect new partnership ratios

UC-B2-01
Partnership Annual Profit Allocation

Actors	Trigger	Applies To	Modules
Managing Partner, Finance Manager	Year-end financial close completed; profit allocation required	Partnership (General, Limited, LLP)	Finance (14), Board (04), Communications (07), Legal Entity (13)

Preconditions

- Partnership deed with profit-sharing ratios stored in CMS
- Annual P&L finalized in Finance Module

Main Success Flow

33. Finance Manager confirms final net profit after tax for the year.
34. Finance Module reads partnership profit-sharing ratios from configuration.
35. Profit allocation computed per partner per their share percentage.
36. Allocation journal entries created: P&L to partner capital accounts.
37. Partner drawings already debited during year reconciled against allocation.
38. Each partner receives a capital account statement via Communications Module.
39. Managing Partner approves allocation; Partners Meeting resolution recorded.
40. If loss: negative allocation applied; partners notified of capital account impact.

Alternative / Exception Flows

- Partner has different ratios for different income streams: layered allocation rules applied.

Postconditions

- Profit allocated; capital accounts updated; partner statements distributed

B.3 Private & Public Corporation

Separate legal entity with shareholders, directors, and limited liability. Ranges from 1-person private company to publicly listed multinational.

Corporations are the most complex standard business structure — requiring full statutory compliance, formal board governance, share capital management, and in public companies, continuous disclosure obligations.

Characteristic	Corporation in UME
Legal Entities	1+ companies; subsidiaries tracked in Chombo entity graph
Board Governance	Full Board Module: directors, committees, minutes, resolutions, board packs
Share Capital	Shareholder register (tracked via CRM); share issuances via Finance Module
Statutory Filing	Annual returns, financial statements, director changes — all tracked in Chombo
For Public Co.	Continuous disclosure, investor relations module (CRM for institutional investors)

Workflow B.3.1: Annual General Meeting (AGM) Preparation

#	Actor	Action	Module	Output / Outcome
1	**Company Secretary**	Set AGM date; create meeting in Board Module; issue AGM notice	*Board (04)*	AGM meeting record created; statutory notice period tracking starts
2	**Finance Manager**	Finalize annual financial statements for board approval	*Finance (14)*	Audited P&L, Balance Sheet, Cash Flow Statement finalized
3	**Legal Officer**	Prepare director election/re-election resolutions	*Board (04) + Templates (39)*	Resolutions drafted; director nomination papers generated
4	**Company Secretary**	Compile AGM pack: accounts, director reports, resolutions, proxy form	*Board (04) + Templates (39)*	AGM pack assembled; distributed to shareholders per statutory deadline
5	**Shareholders / CRM**	Proxy votes received; logged against shareholder records	*CRM (08)*	Proxy register updated; voting count prepared
6	**Company Secretary**	Conduct AGM; record attendance and quorum; vote on resolutions	*Board (04)*	Minutes recorded; resolutions passed; results logged
7	**Legal Officer**	File AGM results with companies registry; update statutory register	*Legal Entity (13) + CMS (06)*	Registry filing completed; director register updated
8	**Chombo (auto)**	Mark annual return filing as satisfied; update compliance status	*Legal Entity (13)*	Compliance calendar updated; next AGM window calculated

B.4 Cooperative (Consumer, Worker, Producer & Multi-Stakeholder)

Member-owned and democratically governed. Profit distributed as surplus to members. Strong emphasis on member participation and democratic decision-making.

Cooperatives require member registry management, democratic governance workflows (one-member-one-vote), surplus distribution calculations, and member engagement tracking that differs from investor-owned corporations.

Workflow B.4.1: Annual Member Surplus Distribution

#	Actor	Action	Module	Output / Outcome
1	**Finance Manager**	Calculate annual surplus (profit) after reserves and tax	*Finance (14)*	Net distributable surplus computed per cooperative rules
2	**Finance Manager**	Calculate patronage dividend per member based on trade	*Finance (14)*	Per-member trade volumes retrieved; dividend rate computed
3	**Board**	Approve surplus distribution rate at general meeting	*Board (04)*	Resolution passed; distribution rate formally approved
4	**Finance Module (auto)**	Generate member surplus statements from template	*Finance (14) + Templates (39)*	Individual surplus statements per member; personalised with trade volume
5	**Communications (auto)**	Distribute surplus statements to all members	*Communications (07)*	Members notified of their entitlement; payment schedule communicated
6	**Finance Module (auto)**	Process surplus payments; post to ledger	*Finance (14)*	Payments made; member ledger accounts updated; tax obligations noted

UC-B4-01 Cooperative Member Voting on Strategic Resolution

Actors	Trigger	Applies To	Modules
Board Secretary, Members, General Manager	Board proposes a major strategic change requiring member approval	Consumer Cooperative, Worker Cooperative, Multi-Stakeholder Cooperative	Board (04), CRM (08), Communications (07), Strategy (21)

Preconditions

- Member registry current in CRM Module
- General meeting notice period satisfied
- Voting method configured (in-person, proxy, electronic)

Main Success Flow

41. Board Secretary creates general meeting in Board Module; adds resolution to agenda.
42. Notice distributed to all members via Communications Module with proxy form.
43. Members submit proxy votes via portal; proxy register updated in CRM.
44. At meeting: quorum confirmed; attendance registered.
45. Resolution put to vote; votes (in-person + proxy) counted.
46. Result recorded in Board Module: resolution passed or failed with vote count.
47. Minutes prepared and distributed to all members within statutory period.
48. If passed: relevant module updated (e.g., strategic objective created in Strategy Module).

Alternative / Exception Flows

- Electronic voting enabled: Members vote via portal before meeting; results tabled at meeting.

- Quorum not reached: meeting adjourned; reconvening notice issued.

Postconditions

- Resolution recorded; minutes distributed; follow-up actions created in Work Module

B.5 Non-Profit Organization / Charity / Foundation

Mission-driven; not organized for profit. Governed by a board of trustees/directors. Funded by donations, grants, and membership fees. Accountable to beneficiaries and regulators.

Non-profits require grant management, donor relationship management, impact measurement, restricted vs unrestricted fund accounting, and trustee governance workflows distinct from for-profit companies.

Persona	ORG-NPO-01 — Non-Profit Executive Director
Org Context	Non-profit / Charity / Foundation
Scale	1–500 staff; typically $100K–$50M annual budget
Description	Leads the organization's mission execution. Accountable to the board of trustees, donors, regulators, and beneficiaries. Balances mission impact with financial sustainability.
Key Modules	Strategy (21), Finance (14), Analytics (02), Board (04), CRM (08), GRC (15)
Goals	Demonstrate mission impact; secure sustainable funding; maintain regulatory compliance; report to board
Challenges	Restricted funding complexity; grant reporting burden; impact measurement difficulty
UME Value	UME Finance handles fund accounting; CRM manages donors; Analytics tracks impact KPIs

Workflow B.5.1: Grant Application and Fund Management

#	Actor	Action	Module	Output / Outcome
1	**Programs Manager**	Identify grant opportunity; log in Business Development Module	*BizDev (05)*	Grant opportunity created in BD pipeline; deadline tracked
2	**Programs Manager**	Draft grant application using grant template	*Templates (39) + CMS (06)*	Application drafted; supporting documents assembled
3	**Executive Director**	Review and approve application; board sign-off if required	*Board (04) + Work (40)*	Application approved; board resolution if required
4	**Programs Manager**	Submit grant application; log submission in BD Module	*BizDev (05)*	Submission recorded; acknowledgement tracked
5	**Finance Manager**	Grant awarded: create restricted fund account in Finance Module	*Finance (14)*	Restricted fund created; grant conditions stored
6	**Programs Manager**	Spend grant funds; all expenditure coded to restricted fund	*Finance (14) + Work (40)*	Grant expenditure tracked separately; fund balance monitored
7	**Analytics (auto)**	Track program impact KPIs linked to grant objectives	*Analytics (02)*	Impact metrics computed; grant reporting dashboard live
8	**Programs Manager**	Prepare grant progress report from finance and analytics data	*Finance (14) + Analytics (02) + Templates (39)*	Donor report generated; submitted on schedule
9	**Finance (auto)**	Alert when grant fund balance approaches zero	*Finance (14)*	Fund exhaustion alert; Programs Manager initiates renewal

UC-B5-01 Trustee Board Governance Cycle

Actors	Trigger	Applies To	Modules
Chair, Trustees, Executive Director, Company Secretary	Quarterly trustee board meeting	Charity, Foundation, Non-Profit, NGO	Board (04), Finance (14), Analytics (02), Risk (33), Templates (39), CMS (06)

Preconditions

- Trustee records registered in Board Module
- Annual governance calendar set in Schedule Module

Main Success Flow

49. Company Secretary prepares board pack: CEO report, financial performance, program impact, risk update.
50. Impact metrics pulled from Analytics Module; financial statements from Finance Module.
51. Risk register summary pulled from Risk Module and GRC Module.
52. Board pack assembled from template; distributed to trustees.
53. Meeting convened; quorum confirmed; minutes recorded in Board Module.
54. CEO presents: program impact, financial performance, risks, and recommendations.
55. Trustees question, deliberate, and pass resolutions.
56. Minutes approved at next meeting; published in CMS.
57. Action items assigned to Executive Director and management team via Work Module.

Alternative / Exception Flows

- Trustee conflict of interest declared: trustee excluded from specific item; declaration logged.

Postconditions

- Board pack published; resolutions recorded; action items tracked in Work Module

B.6 For-Profit Business (SME to Large Enterprise)

Profit-motivated entity across all sectors. Encompasses everything from a 5-person restaurant to a 10,000-person professional services firm.

For-profit businesses span the widest range of size, complexity, and sector. Common patterns include growth management, profitability optimization, talent retention, and competitive positioning.

Workflow B.6.1: Business Scaling from 10 to 100 Employees

#	Actor	Action	Module	Output / Outcome
1	**CEO / Owner**	Formalize strategy: define scaling plan, growth OKRs, headcount plan	*Strategy (21)*	3-year scaling roadmap; OKRs cascaded to functions
2	**CFO / Finance**	Model financial plan: headcount cost, revenue projections, funding need	*Finance (14)*	Financial model; funding requirement identified
3	**HR Manager**	Build workforce plan: roles needed by quarter; create job requisitions	*HR (16)*	12 requisitions created; recruitment pipeline opened
4	**IT Admin**	Scale IT infrastructure; procure hardware for new hires	*IT (18) + Supply Chain (37)*	Hardware procured; CMDB updated; provisioning pipeline ready
5	**HR Module (auto)**	Run structured onboarding for each new hire batch	*HR (16) + Process (29)*	Onboarding workflows triggered per hire; completion tracked
6	**Finance Manager**	Implement departmental budgets; assign cost center owners	*Finance (14) + Admin (01)*	Budget lines active; variance tracking begins
7	**COO**	Formalize operational processes; document in Process Module	*Process (29) + Knowledge (19)*	Core processes defined; runbooks published in Knowledge Module
8	**Analytics Module (auto)**	Track scaling KPIs: revenue-per-head, CAC, NPS, employee NPS	*Analytics (02)*	Scaling health dashboard live; CEO reviews weekly

B.7 Investment Fund (VC, PE, Hedge, Family Office, Endowment)

Pools capital to invest in financial assets or companies. Governed by an investment committee and GP/LP or trustee structure. Highly regulated in most jurisdictions.

Persona	ORG-INV-01 — Fund Manager / General Partner
Org Context	Investment fund — VC, PE, Hedge, Family Office
Scale	$10M–$10B+ AUM
Description	Responsible for deploying capital into investments, managing the portfolio, returning capital to LPs, and meeting regulatory obligations for the fund.
Key Modules	Investment (17), Finance (14), Legal Entity (13), CRM (08), Analytics (02), Board (04)
Goals	Deploy capital at target IRR; manage portfolio companies; return capital to LPs; stay regulated
Challenges	Deal sourcing consistency; portfolio company monitoring; LP reporting burden
UME Value	Investment Module tracks full portfolio; Analytics computes returns and benchmarks; CRM manages LPs

Workflow B.7.1: Investment Committee Deal Review

#	Actor	Action	Module	Output / Outcome
1	**Investment Associate**	Log new investment opportunity; initial screen scorecard	*Investment (17) + BizDev (05)*	Investment record created; initial screening score computed
2	**Investment Associate**	Conduct due diligence; log DD findings and risks	*Investment (17)*	DD findings recorded; risk items logged; score updated
3	**Analyst**	Build investment appraisal: DCF, IRR, multiple scenarios	*Investment (17)*	Appraisal model with base/bull/bear scenarios; NPV and IRR computed
4	**Fund Manager**	Prepare Investment Committee memo from appraisal and DD	*Templates (39) + Investment (17)*	IC memo generated; distributed to IC members
5	**Investment Committee**	Convene IC meeting; review memo; vote on investment	*Board (04)*	IC resolution recorded; approved/declined/deferred
6	**Legal Officer**	Negotiate term sheet; execute investment agreement	*CMS (06) + Legal Entity (13)*	Term sheet executed; investment agreement stored
7	**Finance Manager**	Record capital deployment; update fund NAV	*Finance (14) + Investment (17)*	Investment position created; fund NAV updated; LP notifications sent
8	**Analytics (auto)**	Begin portfolio company performance monitoring	*Analytics (02) + Investment (17)*	Portfolio monitoring dashboard live; return metrics tracking

UC-B7-01 Produce Quarterly LP Investor Report

Actors	Trigger	Applies To	Modules
Fund Manager (ORG-INV-01), Finance Manager	End of quarter; LP reporting obligation due	Investment Fund, Family Office, Endowment	Investment (17), Finance (14), Analytics (02), CRM (08), Templates (39), Communications (07)

Preconditions

- Portfolio company valuations updated
- Fund NAV computed for period
- LP contact records in CRM

Main Success Flow

58. Finance Manager finalizes fund financial statements for the quarter.
59. Investment Module computes portfolio-level IRR, MOIC, and DPI for the period.
60. Analytics Module produces portfolio company performance summaries.
61. Fund Manager writes commentary: portfolio highlights, market observations, outlook.
62. LP report generated from branded template: fund performance, portfolio summary, financials.
63. LP report distributed via Communications Module to all LP CRM contacts.
64. Delivery confirmation tracked; LP acknowledgements recorded.
65. Regulatory reporting obligations confirmed as satisfied in Legal Entity Module.

Alternative / Exception Flows

- LP requests additional drill-down: Finance Manager provides supplementary data on request.

Postconditions

- LP report distributed; regulatory obligation satisfied; LP relationships updated in CRM

B.8 Bank & Financial Services Institution

Accepts deposits, extends credit, and/or provides financial infrastructure. Subject to intensive prudential regulation (Basel, DORA, etc.) and conduct regulation.

Banks and financial institutions have specialized UME usage: extensive GRC and regulatory compliance workflows, sophisticated risk management, product/service catalog management for financial products, and AML/KYC compliance workflows.

Persona	ORG-BNK-01 — Branch / Business Unit Manager (Bank)
Org Context	Retail, commercial, or investment bank
Scale	Unit managing $50M–$5B in assets
Description	Manages a banking unit's P&L, staff, customer relationships, risk exposure, and regulatory compliance. Balances revenue growth with prudential requirements.
Key Modules	Finance (14), Risk (33), GRC (15), CRM (08), HR (16), Analytics (02)
Goals	Grow loan book profitably; maintain NPL ratio; pass regulatory exams; retain key staff
Challenges	Regulatory reporting burden; risk monitoring complexity; fragmented customer data
UME Value	GRC Module maps all regulatory obligations; Risk Module monitors NPL and credit KRIs; CRM tracks relationships

Workflow B.8.1: AML/KYC Customer Onboarding

#	Actor	Action	Module	Output / Outcome
1	**Relationship Manager**	Create new customer record in CRM; initiate KYC workflow	*CRM (08) + Process (29)*	Customer record created; KYC workflow instance started
2	**Customer**	Provides ID documents and beneficial ownership declarations	*CMS (06)*	KYC documents stored; document integrity checked
3	**Compliance Officer**	Screen customer against sanctions and PEP lists via Security/GRC	*Security (36) + GRC (15)*	Sanctions screening completed; PEP status recorded
4	**Compliance Officer**	Assess customer risk rating: standard, enhanced, or simplified due diligence	*GRC (15)*	Customer risk rating assigned; EDD triggered if high-risk
5	**AML Officer**	Complete KYC checklist; approve or refer for further review	*GRC (15) + Work (40)*	KYC approved; customer activated or referral escalated
6	**CRM Module (auto)**	Update customer profile with KYC completion and review date	*CRM (08)*	KYC review scheduled for next cycle; customer CRM status active
7	**Compliance Module (auto)**	Write regulatory audit record of KYC completion	*GRC (15) + Audit*	Immutable KYC audit trail created; regulator inspection-ready

UC-B8-01 Prudential Risk Reporting (Basel/ICAAP)

Actors	Trigger	Applies To	Modules

Chief Risk Officer, Finance Manager, Compliance Officer	Quarterly regulatory reporting deadline	Bank, Credit Union, Insurance Company	Risk (33), Finance (14), GRC (15), Analytics (02), Board (04), Legal Entity (13)

Preconditions

- Risk register current; capital adequacy model configured
- Financial data finalized for period

Main Success Flow

66. Risk Manager pulls top enterprise risks from Risk Module; ensures residual scores current.
67. Finance Manager computes regulatory capital ratios from balance sheet data.
68. GRC Module maps capital requirements to regulatory obligation tracker.
69. Analytics Module produces risk-weighted asset calculations and capital adequacy ratios.
70. ICAAP narrative drafted: stress test scenarios, management actions, forward look.
71. Board reviews and approves submission via Board Module.
72. Regulatory return submitted; submission record and evidence stored in CMS.
73. Submission deadline marked satisfied in Legal Entity Module compliance calendar.

Alternative / Exception Flows

- Capital ratio below regulatory minimum: immediate escalation to CEO and Board; remediation plan initiated.

Postconditions

- Regulatory return submitted; obligation satisfied; board approval recorded

B.9 University, College & Academic Institution

Delivers education, conducts research, and transfers knowledge. Governed by a senate/council and executive. Funded by tuition, grants, endowment, and government.

Persona	ORG-ACA-01 — Department Head / Dean
Org Context	University / College
Scale	Academic unit: 20–500 staff + students
Description	Leads an academic department or faculty. Responsible for curriculum delivery, research output, staff management, student experience, and budget management.
Key Modules	HR (16), Finance (14), Learning (20), Knowledge (19), Analytics (02), GRC (15)
Goals	Research output (citations, grants); student satisfaction; staff retention; budget management
Challenges	Research grant administration complexity; student outcomes tracking; compliance with accreditation bodies
UME Value	Finance handles grant fund accounting; Learning manages curriculum; Analytics tracks outcomes

Workflow B.9.1: Research Grant Lifecycle

#	Actor	Action	Module	Output / Outcome
1	**Principal Investigator**	Identify grant call; submit expression of interest	*BizDev (05)*	Grant opportunity logged; PI assigned; deadline tracked
2	**Research Office**	Prepare full grant application; ethics clearance if required	*GRC (15) + Templates (39)*	Grant application drafted; ethics approval workflow started
3	**Finance Manager**	Cost grant application: direct and indirect costs; overhead recovery	*Finance (14)*	Budget for grant period costed; overhead recovery rate applied
4	**PI + Research Office**	Submit grant application to funder	*BizDev (05) + CMS (06)*	Submission recorded; acknowledgement filed
5	**Finance Manager**	Grant awarded: set up project account with restricted fund	*Finance (14)*	Project account active; budget lines per grant work package created
6	**Research Team**	Conduct research; log expenditure and time against grant	*Work (40) + Finance (14)*	Expenditure tracked; deliverables managed as work items
7	**Analytics (auto)**	Track research outputs: publications, citations, IP disclosures	*Analytics (02) + Knowledge (19)*	Research KPI dashboard live; output metrics tracked
8	**Research Office**	Prepare funder progress reports at milestone dates	*Finance (14) + Analytics (02) + Templates (39)*	Progress report generated; submitted to funder on schedule
9	**Finance Manager**	Grant closeout: reconcile spend; return unspent funds if required	*Finance (14)*	Grant account closed; final financial report filed

UC-B9-01
Academic Accreditation Review

Actors	Trigger	Applies To	Modules
Dean, Quality Assurance Manager, Accreditation Body	Periodic accreditation review cycle (typically every 5–7 years)	University, College, Professional Training Institution	Portfolio (27), GRC (15), Learning (20), Analytics (02), Board (04), CMS (06)

Preconditions

- Curriculum documentation current in CMS
- Learning outcomes data in Analytics
- GRC obligation registered for accreditation

Main Success Flow

74. Quality Assurance Manager creates accreditation project in Portfolio Module.
75. Self-study documentation compiled: curriculum, learning outcomes, staff qualifications.
76. Learning Module exports completion rates, assessment scores, student satisfaction data.
77. Analytics generates research output and impact metrics.
78. GRC Module maps accreditation standards to compliance obligations; evidence attached.
79. Self-study report drafted from template; reviewed by Dean and Academic Board.
80. External review team visit coordinated via Schedule Module.
81. Board approves submission; report submitted to accreditation body.
82. Accreditation outcome recorded in GRC Module; conditions tracked as obligations.

Alternative / Exception Flows

- Conditional accreditation: improvement plan created in Work Module; progress tracked against conditions.

Postconditions

- Accreditation status updated; improvement conditions tracked; next review scheduled

B.10 Training Center, Institute & Professional Development Facility

Delivers structured learning programs to external learners, corporate clients, or professionals. Revenue from course fees, corporate contracts, or government funding.

Training facilities are learning-product businesses. UME powers their course catalog, learner management, corporate client relationships, accreditation compliance, and training effectiveness measurement.

Workflow B.10.1: Corporate Training Contract Delivery

#	Actor	Action	Module	Output / Outcome
1	**Sales Representative**	Corporate client inquiry; qualify training need; propose program	*Sales (34) + CRM (08)*	Opportunity created; training needs assessment conducted
2	**Training Director**	Design custom training program; cost the delivery	*Learning (20) + Finance (14)*	Custom learning path created; program costings computed
3	**Sales Rep**	Contract signed; learner list provided by client	*Sales (34) + CMS (06)*	Contract stored; learner list imported to HR/CRM
4	**Learning Module (auto)**	Enroll all corporate learners; send access credentials	*Learning (20) + Communications (07)*	Learner accounts created; enrollment confirmations sent
5	**Learners**	Complete training modules; assessments graded	*Learning (20)*	Completion and scores tracked per learner
6	**Trainer / Facilitator**	Deliver live sessions (if blended); log attendance	*Schedule (35) + Learning (20)*	Session attendance recorded; virtual or in-person managed
7	**Learning Module (auto)**	Issue certificates on completion; track CPD credits	*Learning (20)*	Certificates generated from template; distributed to learners
8	**Analytics Module (auto)**	Compute training effectiveness: pre/post knowledge scores, NPS	*Analytics (02)*	Effectiveness report generated; improvement areas flagged
9	**Finance Module (auto)**	Invoice client at contract milestone; reconcile payment	*Finance (14)*	Invoice issued; revenue recognized; payment tracked
10	**Account Manager**	Share effectiveness report with client; discuss renewal	*CRM (08) + Analytics (02)*	Client engagement updated; renewal opportunity opened

Part C: Organization Life-Stage Workflows

Organizations evolve through distinct life stages — each with unique operational priorities, compliance requirements, and UME usage patterns. This section maps workflows to each life stage.

C.1 Idea Stage (Pre-Incorporation / Pre-Revenue)

The organization exists only as an idea or informal arrangement. Founders are validating a hypothesis before committing to formal structure. UME operates as a personal thinking OS.

Priority	Workflow	Primary Modules
#1	Document the idea: vision, problem statement, target customer, hypothesis	Strategy (21), Knowledge (19)
#2	Build a lean business case: cost/revenue assumptions, TAM sizing	Finance (14), BizDev (05)
#3	Track competitor research and market intelligence	BizDev (05), Analytics (02)
#4	Define MVP scope and validate with potential users	Product (30), Work (40)
#5	Identify co-founders or advisors; track conversations	CRM (08), Teams (38)

Workflow C.1.1: Idea Validation Cycle

#	Actor	Action	Module	Output / Outcome
1	**Founder**	Create "Org" in UME; enter vision and problem statement	*Strategy (21)*	Vision and mission documented; strategic context established
2	**Founder**	Define validation hypotheses as OKRs (time-boxed)	*Strategy (21)*	Hypotheses tracked as OKRs with 30/60/90 day key results
3	**Founder**	Log market research, competitor notes, customer interviews	*Knowledge (19) + BizDev (05)*	Market intelligence repository building; insights searchable
4	**Founder**	Build a simple financial model: unit economics, runway scenarios	*Finance (14)*	Revenue/cost model; break-even projection; funding need estimate
5	**Founder**	Track hypothesis test results weekly; update OKR progress	*Strategy (21)*	Evidence accumulates; pivot/persevere decision data available
6	**Founder**	Decide to proceed: select legal structure; register entity	*Legal Entity (13)*	Entity registration initiated; compliance evaluation begins

C.2 Startup / Early Stage (0–3 Years, Seed to Series A)

Organization is formally constituted. Focused on product-market fit, early customers, and demonstrating unit economics to investors. Speed and capital efficiency are paramount.

Priority	Workflow	Primary Modules

#1	Close paying customers; iterate product rapidly	Sales (34), Product (30), Work (40)
#2	Track burn rate daily; extend runway	Finance (14), Analytics (02)
#3	Hire first employees; maintain culture as team grows	HR (16), Teams (38)
#4	Satisfy statutory compliance; avoid penalties	Legal Entity (13), GRC (15)
#5	Build investor relationships; manage fundraising pipeline	Investment (17), CRM (08)

Workflow C.2.1: Fundraising Round (Seed / Series A)

#	Actor	Action	Module	Output / Outcome
1	**CEO**	Define funding objective; create investor target list in CRM	*CRM (08) + Investment (17)*	Target investor profiles created; outreach plan drafted
2	**CFO**	Prepare financial model: projections, unit economics, use of funds	*Finance (14) + Templates (39)*	Investor-ready financial model; pitch deck financial slides
3	**CEO**	Outreach to investors; log all conversations in CRM	*CRM (08) + Communications (07)*	Interaction history per investor; pipeline stage tracked
4	**Legal Officer**	Prepare data room: cap table, contracts, IP assignments, financials	*CMS (06) + Legal Entity (13)*	Secure data room assembled; investor access managed via permissions
5	**CEO**	Term sheet received: log as investment record; legal review	*Investment (17) + Legal Entity (13)*	Term sheet stored; negotiation tracked; key terms summarized
6	**Legal Officer**	Negotiate and execute investment agreements	*CMS (06)*	Investment agreements signed and version-controlled
7	**Finance Manager**	Record capital receipt; update cap table; issue shares	*Finance (14)*	Share issuance posted; cap table updated; entity structure updated
8	**CEO**	Update investors quarterly via LP/investor report	*Analytics (02) + Templates (39) + Communications (07)*	Investor updates distributed on schedule; relationships maintained

C.3 Growth Stage (Series B+, Scaling, Expansion)

Product-market fit proven. Now focused on scaling revenue, building management layer, expanding into new markets, and building operational infrastructure to support rapid growth without breaking.

Priority	Workflow	Primary Modules
#1	Scale sales and marketing machine; reduce CAC	Sales (34), Marketing (22), Analytics (02)
#2	Build management layer; formalize HR practices	HR (16), Learning (20), Teams (38)
#3	Expand into new markets; register entities	Legal Entity (13), Finance (14)
#4	Implement formal GRC; prepare for institutional scrutiny	GRC (15), Risk (33), Security (36)

#5	Build product for enterprise: security, compliance, uptime	Engineering (10), IT (18), Security (36)

Workflow C.3.1: Geographic Expansion into a New Market

#	Actor	Action	Module	Output / Outcome
1	**CEO + Strategy**	Approve new market entry as strategic initiative	*Strategy (21) + Portfolio (27)*	Market entry initiative created; exec sponsor assigned
2	**Legal Officer**	Register new legal entity in target jurisdiction	*Legal Entity (13)*	Entity registered; Chombo runs jurisdiction-specific compliance evaluation
3	**HR Manager**	Hire country/market lead; local employment contracts	*HR (16) + CMS (06)*	Local hire onboarded; local employment law obligations identified
4	**Finance Manager**	Open local banking; configure local entity COA and tax	*Finance (14)*	Local entity accounts live; intercompany transfer pricing configured
5	**Marketing Manager**	Register localized go-to-market campaign	*Marketing (22)*	Localized campaign; Soko evaluates with regional strategy packs
6	**Sales Manager**	Build local pipeline; assign territory to sales team	*Sales (34)*	Local pipeline active; territory and quotas assigned
7	**IT Admin**	Provision local IT infrastructure; comply with data residency rules	*IT (18) + Security (36)*	Local IT active; data residency compliance confirmed
8	**COO**	Set up local operations; define SLAs; hire ops team	*Operations (25) + HR (16)*	Local operations running; SLA monitoring active

C.4 Mature Organization (Established, Multi-Year Track Record)

Mature organizations face a different challenge: maintaining performance while managing complexity, avoiding bureaucratic drag, refreshing strategy, and preparing for succession or liquidity events.

Workflow C.4.1: Leadership Succession Planning

#	Actor	Action	Module	Output / Outcome
1	**CHRO + CEO**	Identify critical roles for succession planning; assess succession depth	*HR (16) + Analytics (02)*	Succession gaps identified; top 20 critical roles listed
2	**HR Manager**	Assess internal candidates: performance, potential, readiness	*HR (16)*	9-box grid populated; readiness ratings assigned
3	**CHRO**	Present succession plan to board; gain approval	*Board (04)*	Succession plan approved; board resolution recorded
4	**HR Manager**	Create accelerated development plans for "Ready Now" candidates	*HR (16) + Learning (20)*	Development plans created; stretch assignments and learning paths assigned
5	**Analytics (auto)**	Track development plan progress; flag candidates falling behind	*Analytics (02)*	Succession readiness dashboard live; quarterly alerts on gaps

6	**CHRO**	Annual succession review: update ratings; adjust plans	*HR (16) + Board (04)*	Plan refreshed; board updated; bench strength trend visible

UC-C4-01 Organization Renewal / Strategic Transformation

Actors	Trigger	Applies To	Modules
CEO, Board, Strategy Team, All Department Heads	Declining performance, market disruption, or board mandate for transformation	Any mature organization	Strategy (21), Portfolio (27), Analytics (02), Board (04), Communications (07), Knowledge (19)

Preconditions

- Current strategy and OKRs active
- Performance analytics available
- Risk register current

Main Success Flow

83. CEO commissions transformation program; creates initiative in Portfolio Module.
84. Analytics Module surfaces performance decline signals across all KPIs.
85. PESTLE and SWOT analyses updated in Strategy Module.
86. Transformation program defined: change thesis, vision, workstreams.
87. Board approves transformation mandate; resolution recorded.
88. Each workstream becomes a project in Portfolio Module with dedicated PM.
89. Change management communications plan executed via Communications Module.
90. Transformation OKRs set; progress reviewed monthly in strategy reviews.
91. Lessons learned captured throughout; Knowledge Module updated.
92. Post-transformation: new steady-state OKRs set; transformation project closed.

Alternative / Exception Flows

- Transformation stalls: Board intervention; executive changes if required.

Postconditions

- Transformation program complete; new strategy active; lessons captured

Part D: Sector-Specific Workflows

This section covers workflows tailored to specific sectors and organizational types that have distinct regulatory environments, stakeholder structures, or operational models requiring specialized UME usage patterns.

D.1 Government & Public Sector Organizations

Delivers public services, enforces law, and manages public resources. Accountable to citizens, legislators, and audit bodies. Subject to public procurement, FOI, and public finance rules.

Persona	GOV-01 — Government Department Head / Secretary
Org Context	National, State, or Local Government
Scale	100–10,000 staff; public budget
Description	Leads a government department responsible for policy delivery, public service, and stewardship of public resources. Accountable to minister and legislature.
Key Modules	Strategy (21), Finance (14), HR (16), GRC (15), Analytics (02), Operations (25)
Goals	Deliver policy objectives; manage within budget; satisfy audit; maintain public trust
Challenges	Treasury rules restrict flexibility; political environment creates uncertainty; audit scrutiny is high
UME Value	UME provides transparent operations, audit-ready records, and KPI-linked budget management

Workflow D.1.1: Public Budget Cycle (Annual Estimates Process)

#	Actor	Action	Module	Output / Outcome
1	**Department Head**	Receive budget circular from Finance Ministry; initiate estimates	*Finance (14) + Strategy (21)*	Budget instruction received; departmental estimates cycle opened
2	**Program Managers**	Submit budget submissions by program: baseline + bids + savings	*Finance (14)*	Budget submissions per program with justification notes
3	**Finance Manager**	Consolidate departmental estimates; cross-check against strategy	*Finance (14) + Strategy (21)*	Consolidated estimates with OKR linkage; gap analysis vs policy commitments
4	**Department Head**	Negotiate with Finance Ministry; defend estimates	*Finance (14) + Board (04)*	Negotiation positions tracked; concessions logged
5	**Finance Ministry**	Budget approved in legislature; allocation notified	*Finance (14)*	Approved budget lines entered; allocations locked per appropriation
6	**Finance Module (auto)**	Track actual spend vs appropriation; flag over-commitment	*Finance (14)*	Real-time appropriation compliance monitoring; Accounting Officer alerted
7	**Analytics Module (auto)**	Produce monthly management accounts for minister and audit body	*Analytics (02) + Finance (14)*	Ministerial management information; performance vs budget published

Workflow D.1.2: Freedom of Information (FOI) Request Management

#	Actor	Action	Module	Output / Outcome

1	**FOI Officer**	Receive FOI request; create case in Work Module	*Work (40) + Process (29)*	FOI case created; statutory response deadline set
2	**FOI Officer**	Search CMS and Knowledge Module for relevant records	*CMS (06) + Knowledge (19)*	Relevant documents identified; scope of request assessed
3	**Legal Officer**	Review records for exemptions; advise on redactions	*Legal Entity (13) + CMS (06)*	Exemption analysis completed; redaction decisions documented
4	**Department Head**	Sign off on FOI response; approve any exemption claims	*Work (40)*	Response approved; decision rationale documented
5	**FOI Officer**	Issue response to requester within statutory deadline	*Communications (07) + Work (40)*	Response sent; delivery confirmed; case closed with audit record
6	**GRC Module (auto)**	Track FOI compliance rate; report to information commissioner	*GRC (15)*	FOI compliance metrics; regulatory reporting data maintained

UC-D1-01 Public Procurement Process

Actors	Trigger	Applies To	Modules
Procurement Officer, Finance Manager, Department Head	Requirement above public procurement threshold identified	Government Departments, Public Bodies, State-Owned Enterprises	Supply Chain (37), GRC (15), CRM (08), Finance (14), CMS (06), Work (40)

Preconditions

- Budget approved for the procurement
- Specification prepared; procurement threshold rules configured in GRC

Main Success Flow

93. Procurement Officer registers procurement requirement; confirms above threshold.
94. GRC Module confirms applicable procurement rules (open tender required).
95. Procurement Officer publishes tender notice; supplier responses registered in CRM.
96. Evaluation panel scores supplier proposals against criteria in Work Module.
97. Evaluation report prepared; contract award recommendation made.
98. Department Head approves award; decision documented with rationale.
99. Unsuccessful suppliers notified per statutory standstill period.
100. Contract executed and stored in CMS; supplier registered in Supply Chain Module.
101. Contract performance tracked; KPIs monitored; payments approved via Finance Module.

Alternative / Exception Flows

- Single tender below threshold: simplified direct award workflow with reduced approval steps.
- Legal challenge received: standstill extended; Legal Officer manages challenge via Legal Entity Module.

Postconditions

- Contract awarded; supplier registered; performance monitoring active; audit trail complete

D.2 NGO, International Organization & Global Services

Operates across multiple countries and jurisdictions with a humanitarian, development, or global service mission. Accountable to donors, member states, or international community.

Persona	NGO-01 — Country Director / Regional Manager (INGO)
Org Context	International NGO — regional office
Scale	Country team 10–500 staff; $1M–$50M program budget
Description	Manages a country program within a larger international NGO. Accountable to HQ, donors, government partners, and beneficiaries. Operates in complex, often fragile environments.
Key Modules	Finance (14), HR (16), GRC (15), Analytics (02), Supply Chain (37), Risk (33)
Goals	Deliver programs to beneficiaries; satisfy donor reporting; manage security risks; maintain staff wellbeing
Challenges	Field logistics complexity; multi-donor fund management; staff safety in fragile environments; currency risk
UME Value	Finance Module handles multi-currency multi-donor funds; Risk Module tracks security and program risks

Workflow D.2.1: Humanitarian Program Delivery (Multi-Donor)

#	Actor	Action	Module	Output / Outcome
1	**Country Director**	Receive donor funding; create restricted fund per donor	*Finance (14)*	Donor fund accounts created; budget lines per work package
2	**Programs Team**	Develop program work plan; create project with WBS	*Portfolio (27) + Work (40)*	Program activities as work packages; delivery milestones set
3	**Supply Chain Officer**	Procure program supplies; manage supplier qualifications	*Supply Chain (37)*	Supplier due diligence completed; POs issued; delivery tracked
4	**M&E Officer**	Set up impact monitoring framework; define beneficiary KPIs	*Analytics (02)*	Impact KPIs defined; data collection workflow configured
5	**Field Teams**	Deliver program activities; record beneficiary data	*Work (40) + Analytics (02)*	Activity completion logged; beneficiary reach tracked
6	**Finance Officer**	Code all expenditure to correct donor fund and work package	*Finance (14)*	Donor-segregated expenditure; budget vs actuals per donor
7	**M&E Officer**	Compile program data; compute impact indicators	*Analytics (02)*	Impact scorecard: beneficiaries reached, outcomes achieved
8	**Country Director**	Prepare and submit donor report on schedule	*Finance (14) + Analytics (02) + Templates (39)*	Donor report distributed; acknowledged by donor; obligation marked satisfied

UC-D2-01 Multi-Country Organization Consolidated Reporting

Actors	Trigger	Applies To	Modules

HQ CFO, Regional Finance Managers, Country Directors	Quarterly HQ consolidated reporting cycle	INGO, Multinational NGO, Global Services Organization, Intergovernmental Body	Finance (14), Legal Entity (13), Analytics (02), Risk (33), Board (04), Communications (07)

Preconditions

- All country entities registered in Legal Entity Module
- Intercompany transactions posted and reconciled
- Reporting currency and FX rates configured

Main Success Flow

102. HQ Finance issues reporting instructions via Communications Module; deadline set.
103. Each country office confirms financial data for the period is complete.
104. Finance Module consolidates multi-entity P&L and balance sheet; intercompany eliminations applied.
105. Analytics Module aggregates program impact KPIs across all country offices.
106. Risk Manager collects country-level risk updates; produces consolidated risk summary.
107. Consolidated board report prepared: financial performance, program impact, risk.
108. Board/Governing Board reviews and approves consolidated report.
109. Report distributed to donors, member states, or governing body as required.

Alternative / Exception Flows

- Country office data submitted late: automated escalation to Country Director; deadline enforced.

Postconditions

- Consolidated report published; all entities reflected; audit trail maintained

D.3 Global Supply Chain & International Trade Operations

Manages goods and services flows across multiple countries, jurisdictions, and regulatory environments. Subject to customs, trade compliance, sanctions, and origin rules.

Workflow D.3.1: Cross-Border Trade Compliance

#	Actor	Action	Module	Output / Outcome
1	**Trade Compliance Officer**	Screen shipment against export control and sanctions lists	*Security (36) + GRC (15)*	Sanctions screening completed; export control classification confirmed
2	**Supply Chain Officer**	Verify country of origin for preferential tariff treatment	*Supply Chain (37)*	Origin documentation verified; certificate of origin prepared
3	**Customs Broker**	Prepare import/export documentation; lodge with customs authority	*CMS (06) + Supply Chain (37)*	Customs declaration filed; tariff duty calculated; payment processed
4	**Supply Chain Officer**	Track shipment in transit; monitor for customs holds	*Supply Chain (37)*	Real-time shipment status; delay alerts if held
5	**Finance Manager**	Record import duties, customs fees, and landed costs	*Finance (14)*	Landed cost per shipment; inventory valuation updated
6	**Trade Compliance Officer**	File post-shipment compliance records; maintain trade archive	*CMS (06) + GRC (15)*	Trade compliance archive updated; audit-ready records maintained

UC-D3-01 Supplier ESG Assessment in Global Supply Chain

Actors	Trigger	Applies To	Modules
Procurement Manager, ESG Officer, Supplier	Annual supplier ESG review cycle or new supplier onboarding	Manufacturer, Retailer, Global Services Company, INGO	ESG (11), Supply Chain (37), Communications (07), Work (40), Analytics (02)

Preconditions

- Supplier registered in Supply Chain Module
- ESG assessment questionnaire configured in ESG Module

Main Success Flow

110. ESG Officer sends ESG assessment questionnaire to supplier via Communications Module.
111. Supplier completes questionnaire; responses stored in ESG Module.
112. ESG Module computes supplier ESG score: environment, social, and governance pillars.
113. Supply Chain Module updates supplier tier based on ESG score.
114. Below-threshold suppliers flagged for improvement plan or deregistration.
115. ESG Officer tracks improvement commitments as work items in Work Module.
116. Aggregate supply chain ESG score computed for corporate ESG disclosure.
117. ESG disclosure report updated with supply chain performance data.

Alternative / Exception Flows

- Critical ESG violation: supplier suspended pending remediation; Procurement alerted.

Postconditions

- Supplier ESG scores updated; below-threshold suppliers managed; disclosure data current

D.4 Healthcare Organization (Hospital, Clinic, Health System)

Delivers patient care services. Highly regulated for patient safety, privacy (HIPAA/GDPR), and clinical quality. Workforce-intensive; 24/7 operations.

Workflow D.4.1: Clinical Workforce Rostering and Compliance

#	Actor	Action	Module	Output / Outcome
1	**Workforce Manager**	Build clinical roster: doctors, nurses, allied health by shift	*HR (16) + Schedule (35)*	Roster built; staffing ratios verified against clinical requirements
2	**HR Module (auto)**	Check staff compliance: licenses, certifications, mandatory training	*HR (16) + Learning (20)*	Compliance status per clinician; non-compliant staff flagged
3	**Workforce Manager**	Fill gaps: offer overtime or agency staff as needed	*HR (16) + Supply Chain (37)*	Gaps filled; agency contracts raised for external staff
4	**HR Module (auto)**	Enforce working time rules: max hours, minimum rest periods	*HR (16) + GRC (15)*	Working time compliance enforced; breaches prevented or flagged
5	**Analytics (auto)**	Track clinical workforce KPIs: vacancy rate, agency spend, compliance rate	*Analytics (02)*	Workforce dashboard live; escalation if compliance drops

D.5 Professional Services Firm (Law, Accounting, Consulting, Architecture)

Delivers expert professional services to clients. Revenue from time-billed or project fees. Subject to professional body regulation and client confidentiality obligations.

Workflow D.5.1: Client Matter Lifecycle (Law Firm / Consulting)

#	Actor	Action	Module	Output / Outcome
1	**Partner / Lead**	New matter/project opened; conflict of interest check run	*CRM (08) + GRC (15)*	Matter opened; conflict check passed; engagement letter issued
2	**Partner**	Assemble team; assign team members with roles	*Teams (38) + HR (16)*	Matter team assembled; access granted to matter workspace
3	**Team Members**	Deliver work; log time against matter daily	*Work (40)*	Billable hours accumulate; work items tracked per matter
4	**Finance Manager**	Generate WIP report; prepare fee bill at billing milestone	*Finance (14)*	Fee bill drafted; partner reviews and approves
5	**Finance Module (auto)**	Issue invoice; apply payment terms; track receipt	*Finance (14)*	Invoice sent; payment tracked; dunning if overdue
6	**Partner**	Matter closed; client satisfaction survey sent; lessons captured	*CRM (08) + Knowledge (19)*	Client NPS recorded; lessons published; matter archived

Part E: Global, Multi-Entity & International Organization Workflows

Organizations operating across multiple countries, jurisdictions, and currencies face compounded complexity. This section addresses the workflows unique to global and multi-entity structures: consolidation, transfer pricing, multi-jurisdiction compliance, global treasury, and international talent management.

E.1 Multi-Entity Group Structure Management

A group consisting of a parent and multiple subsidiaries (domestic and international) requires coordinated entity management, group-level financial consolidation, and inter-entity transactions.

Workflow E.1.1: Group Entity Structure Maintenance

#	Actor	Action	Module	Output / Outcome
1	**Group Legal Officer**	Register or update all group entities in Chombo	*Legal Entity (13)*	All entities mapped with ownership percentages and jurisdictions
2	**Group Legal Officer**	Maintain inter-entity relationship graph: parent, subsidiary, JV	*Legal Entity (13)*	Group structure visualization; ownership chain maintained
3	**Chombo (auto)**	Evaluate all entities against applicable policy packs	*Legal Entity (13)*	Consolidated compliance alerts across the group
4	**Company Secretary**	Track all statutory filing deadlines across all entities	*Legal Entity (13) + Schedule (35)*	Group compliance calendar; deadlines color-coded by urgency
5	**Group Finance**	Identify intercompany balances and transactions	*Finance (14)*	Intercompany matrix; elimination candidates identified
6	**Group Finance**	Run group consolidation: eliminate intercompany, compute group P&L	*Finance (14)*	Consolidated group financial statements; minority interests computed

Workflow E.1.2: Transfer Pricing Documentation

#	Actor	Action	Module	Output / Outcome
1	**Group Tax Manager**	Map intercompany transactions: goods, services, IP, financing	*Finance (14) + Legal Entity (13)*	Intercompany transaction register; value and nature documented
2	**Group Tax Manager**	Apply transfer pricing methodology to each transaction type	*Finance (14)*	Arm's-length prices set; methodology (CUP, TNMM, profit split) documented
3	**Legal Officer**	Prepare or update transfer pricing documentation (local and master file)	*CMS (06) + Templates (39)*	TP documentation files created; country-by-country report data compiled
4	**GRC Manager**	Register TP compliance obligations per jurisdiction	*GRC (15) + Legal Entity (13)*	TP filing obligations tracked; deadlines in compliance calendar

5	**Finance Manager**	Ensure TP policies reflected in intercompany agreements	*CMS (06)*	Intercompany agreements version-controlled; pricing terms consistent

UC-E1-01 Group-Wide Annual Compliance Health Check

Actors	Trigger	Applies To	Modules
Group Legal Officer, Group CFO, Country Legal Officers	Annual group compliance review; typically Q1 preceding year-end filings	Corporate Group, Holding Company, Multi-National Enterprise	Legal Entity (13), GRC (15), Analytics (02), Board (04), Work (40), Communications (07)

Preconditions

- All entities registered in Legal Entity Module
- Compliance calendar configured for each entity

Main Success Flow

118. Group Legal Officer runs Chombo evaluate_all_entities() for the group.
119. Chombo evaluates each entity against its jurisdiction-specific policy packs.
120. Consolidated compliance alert report produced: critical, high, medium per entity.
121. Group compliance dashboard surfaced in Portal; color-coded by severity.
122. Country Legal Officers notified of critical alerts for their entities.
123. Remediation tasks created in Work Module; owners assigned; deadlines set.
124. Progress tracked weekly; escalations for overdue items.
125. Group Legal Officer reports to Group Board at quarterly governance meeting.

Alternative / Exception Flows

- Critical alert with imminent deadline: auto-escalation to Group CEO and Group CFO.

Postconditions

- All critical compliance alerts actioned; group compliance posture documented

E.2 Global Treasury & Multi-Currency Operations

Multi-entity global organizations must manage cash pooling, FX exposure, repatriation of profits, and banking relationships across multiple currencies and jurisdictions.

Workflow E.2.1: Group Cash Pool Management

#	Actor	Action	Module	Output / Outcome
1	**Group Treasurer**	Configure cash pool structure in Finance Module; nominate pool header account	*Finance (14)*	Cash pool structure defined; participating entities and accounts registered
2	**Finance Module (auto)**	Aggregate cash balances across pool participants daily	*Finance (14)*	Group cash position computed; net pool balance available
3	**Group Treasurer**	Review daily cash position; identify surplus and deficit entities	*Finance (14) + Analytics (02)*	Cash allocation decisions made; intercompany loans posted where required
4	**Finance Module (auto)**	Compute notional interest on intercompany cash pool positions	*Finance (14)*	Intercompany interest income/expense accruals computed; TP-compliant rates applied
5	**Group Treasurer**	Monitor FX exposures across group; hedge if required	*Finance (14)*	FX exposure report; hedging decisions documented with rationale
6	**Analytics (auto)**	Produce group liquidity dashboard: days of cash, headroom, forecast	*Analytics (02)*	Liquidity dashboard; 13-week cash flow forecast per entity and group

E.3 Global Talent & Workforce Management

Managing a global workforce requires navigating local employment law in each jurisdiction, managing international mobility (expatriates and short-term assignees), and maintaining a global talent pipeline.

Workflow E.3.1: International Secondment / Expatriate Assignment

#	Actor	Action	Module	Output / Outcome
1	**HR Manager (Global)**	Identify secondment requirement; create assignment record	*HR (16)*	Assignment record created; home and host entity linked
2	**Legal Officer**	Assess visa and work permit requirements for destination	*Legal Entity (13) + GRC (15)*	Immigration requirements confirmed; permit application timeline set
3	**HR Manager**	Prepare assignment letter and expatriate package terms	*Templates (39) + HR (16)*	Assignment letter issued; benefits, housing, and tax equalization terms set
4	**Finance Manager**	Set up cost sharing: host entity pays a portion; home entity remainder	*Finance (14)*	Intercompany cost allocation configured; payroll split set up
5	**Tax Advisor**	Assess personal tax obligations in home and host countries	*Finance (14) + GRC (15)*	Tax equalization policy applied; tax filings obligations tracked

6	**HR Module (auto)**	Track assignment timeline; initiate repatriation workflow before end date	*HR (16) + Process (29)*	Repatriation workflow triggered; return role planning initiated

UC-E3-01 Global People Analytics and Workforce Planning

Actors	Trigger	Applies To	Modules
CHRO, Regional HR Managers, Workforce Analytics Team	Annual workforce planning cycle; quarterly people review	Multinational Enterprise, International NGO, Global Services Organization	HR (16), Analytics (02), Learning (20), MDM (23), Board (04)

Preconditions

- All employees registered across entity HR Modules
- Org unit hierarchy aligned across entities
- Analytics KPI definitions uniform

Main Success Flow

126. CHRO commissions global workforce analytics run in Analytics Module.
127. Analytics aggregates: headcount by region, function, level, and tenure.
128. Turnover rates, time-to-fill, and cost-per-hire computed per region.
129. Diversity metrics computed: gender, age band, nationality per level.
130. Succession depth computed: bench strength per critical role globally.
131. Skills gap analysis run: current skills vs future-state requirements.
132. Workforce demand model built: projected headcount need by function and year.
133. Supply vs demand gap identified; hiring and development plan proposed.
134. Workforce plan approved by CHRO and presented to board at talent review.

Alternative / Exception Flows

- Data quality inconsistency across entities: HR Data Steward triggers MDM cleanse before analytics run.

Postconditions

- Workforce plan approved; hiring requisitions created; development plans activated

E.4 Global GRC & Multi-Jurisdiction Regulatory Compliance

Global organizations must comply with regulations across multiple jurisdictions simultaneously. UME's GRC and Legal Entity modules provide a unified view of obligations across the group.

Workflow E.4.1: Regulatory Change Management (Multi-Jurisdiction)

#	Actor	Action	Module	Output / Outcome
1	**Group GRC Manager**	New regulation published; create regulatory change record	*GRC (15)*	Regulatory change record; effective date; jurisdiction scope
2	**GRC Module (auto)**	Map regulation to affected entities and existing obligations	*GRC (15) + Legal Entity (13)*	Impact matrix: which entities and processes are affected
3	**Country Compliance Officers**	Assess impact in their jurisdiction; document local interpretation	*GRC (15)*	Local impact assessments; compliance gap analysis per entity
4	**Group GRC Manager**	Consolidate impact assessments; define group response	*GRC (15)*	Group compliance action plan; policy changes identified
5	**Policy Owner**	Update affected policies; trigger policy approval workflow	*Admin (01) + Process (29)*	Updated policies approved and published; affected staff notified
6	**Training Manager**	Update compliance training content; re-enroll affected staff	*Learning (20)*	Updated compliance training live; re-enrollment records created
7	**GRC Module (auto)**	Track implementation milestones; flag overdue items	*GRC (15) + Work (40)*	Regulatory compliance deadline met; evidence stored

UC-E4-01 GDPR / Data Privacy Compliance Across Jurisdictions

Actors	Trigger	Applies To	Modules
Group Data Protection Officer, Country Privacy Leads, IT Security	Ongoing compliance obligation; triggered by new processing activity or data breach	Any org processing personal data in EU/UK/Brazil/California/etc.	Security (36), GRC (15), Process (29), Portal (26), Communications (07)

Preconditions

- Privacy obligations registered in GRC Module for each jurisdiction
- Records of processing activities (RoPA) configured

Main Success Flow

135. New data processing activity identified; Privacy Officer assesses lawful basis.
136. Processing record created in Security Module (Privacy Manager).
137. Data Protection Impact Assessment (DPIA) conducted if high-risk processing.
138. DPIA outcome: risk mitigation actions created in Work Module.
139. Consent management configured in portal if consent is the lawful basis.
140. Data subject rights procedures tested: DSAR, erasure, portability.
141. Privacy obligation updated in GRC Module; review date set.

142. Annual data privacy compliance review run; RoPA audited for accuracy.
143. If data breach: breach notification workflow triggered; supervisory authority notified within 72 hours.

Alternative / Exception Flows

- Data breach confirmed: Security Module activates breach notification workflow; DPA notified per GDPR Article 33.

Postconditions

- Processing compliant; DPIA documented; RoPA current; DSAR procedures tested

Part F: Extended User Journey Maps

These journey maps follow specific persona types through multi-week or multi-month experiences with the UME OS, illustrating how the system supports daily, weekly, and strategic rhythms.

Journey F-01: The Startup Founder — First 90 Days

Persona: IND-01 (Solo Founder). Scenario: Idea to first paying customer in 90 days.

Moment	Action	Module / Tool	Experience & Outcome
Day 1	Creates org in UME; documents vision, problem, and hypothesis	Strategy (21)	Founder has a structured strategic foundation before writing a line of code
Day 2–5	Builds lean financial model; calculates runway scenarios	Finance (14)	Knows exactly how long the money lasts; makes go/no-go decision with data
Day 5	Registers legal entity; Chombo evaluates compliance requirements	Legal Entity (13)	Filing calendar live; no compliance deadline will be missed
Day 7	Defines MVP backlog; first work sprint started	Work (40) + Product (30)	Prioritized feature list; velocity tracking from day 1
Day 14	Logs first 5 prospect conversations in CRM	CRM (08)	Pipeline visibility; next steps tracked; no prospect falls through cracks
Day 21	Sends first 10 outreach emails; tracks delivery and response	Communications (07)	Response rate measured; message optimization based on data
Day 30	First demo booked; proposal generated from template	Templates (39) + CRM (08)	Professional proposal in minutes; founder doesn't reinvent from scratch
Day 45	MVP feature-complete; soft launch to 3 beta users	Product (30) + Analytics (02)	Usage analytics from day 1; product decisions driven by behavioral data
Day 60	First paid customer closes; invoice issued and paid	Sales (34) + Finance (14)	Revenue journal posted; burn rate dashboard updates in real time
Day 75	5 customers; campaign registered; Soko evaluates strategy	Marketing (22)	70 strategy packs surface insights; founder knows what's working and why
Day 90	Weekly review: OKRs, cash, pipeline, compliance	Portal (26)	Single dashboard; no spreadsheet chaos; informed decisions every Monday

Journey F-02: The Independent Consultant — Monthly Rhythm

Persona: IND-03 (Freelance Consultant). Scenario: Managing three concurrent client engagements over a month.

Moment	Action	Module / Tool	Experience & Outcome

Week 1 Mon	Opens portal; reviews 3 client kanban boards	Work (40)	Instant context on each engagement; knows what to work on today
Week 1 Tue–Fri	Delivers Client A work; logs 22 billable hours	Work (40)	Precise time log; billable hours accumulate without manual timesheet
Week 1 Thu	Discovery call with new prospect; logs interaction and requirements	CRM (08)	Prospect fully documented; proposal prep starts immediately after call
Week 2 Mon	Generates and sends proposal to prospect	Templates (39) + CRM (08)	Branded proposal in 15 minutes; no blank page anxiety
Week 2	Client B invoice milestone reached; invoice auto-generated	Finance (14)	Invoice rendered from time log; sent to client; payment timer starts
Week 3 Mon	Client C sends change request; formal scope change created	Work (40) + CRM (08)	Change documented; Client C agrees; additional fee invoiced cleanly
Week 3	Client A payment received; dunning not needed	Finance (14)	Journal posted; AR cleared; no awkward payment chase email required
Week 4	New prospect accepts proposal; contract generated	Sales (34) + Templates (39)	Engagement started; work items created; billing schedule set
Month End	Finance review: revenue, expenses, outstanding AR	Finance (14) + Analytics (02)	Net income visible; 3 outstanding invoices; AR aging clear
Month End	Reviews utilization rate: 87% billable this month	Analytics (02)	Above target; capacity assessment: can take 5 more hours per week

Journey F-03: The NGO Country Director — Program Quarter

Persona: NGO-01 (Country Director). Scenario: Managing Q2 program delivery under 3 simultaneous donor grants.

Moment	Action	Module / Tool	Experience & Outcome
Month 1 Wk 1	Q2 program kickoff: updates all project work plans for the quarter	Portfolio (27) + Work (40)	Q2 activities visible; team assignments confirmed; milestones in calendar
Month 1 Wk 2	Releases Q1 donor reports for Donor A and Donor B	Finance (14) + Templates (39)	Reports generated in 2 hours from data; distributed on deadline
Month 1	Conducts security risk assessment; updates risk register	Risk (33)	Country security risks current; staff briefed; KRIs monitored
Month 2 Wk 1	Field team completes Phase 1 delivery; records beneficiary data	Work (40) + Analytics (02)	Beneficiary reach updated; impact KPIs refresh on dashboard
Month 2	Procurement of Phase 2 supplies initiated	Supply Chain (37)	Supplier selected; PO issued; delivery date confirmed; funds reserved
Month 2 Wk 3	HQ requests urgent financial report — generated in 30 min	Finance (14) + Analytics (02)	Multi-donor financial position available instantly; no manual extraction
Month 3 Wk 1	Donor C field visit: impact dashboard presented in portal	Analytics (02) + Portal (26)	Donor sees real-time program data; credibility and trust strengthened

Month 3 Wk 2	New grant opportunity identified; application submitted	BizDev (05) + Templates (39)	Grant application pipeline managed; deadline never missed
Month 3	Quarter close: all fund accounts reconciled; reports filed	Finance (14)	Clean Q2 close; compliance calendar shows no overdue items

Journey F-04: The Government Department Manager — Annual Budget Cycle

Persona: GOV-01 (Government Department Head). Scenario: Full annual budget cycle from estimates to outturn reporting.

Moment	Action	Module / Tool	Experience & Outcome
Q4 Yr-1 Nov	Budget circular received; estimates cycle opened for all programs	Finance (14)	Department managers notified; submission templates distributed
Q4 Yr-1 Dec	Program managers submit draft estimates; consolidated review	Finance (14) + Strategy (21)	Consolidated estimates; OKR linkage verified; gaps identified
Q1 Yr0 Jan	Budget negotiations with Treasury; positions tracked	Finance (14) + Board (04)	Negotiation positions documented; concessions managed transparently
Q1 Yr0 Mar	Budget approved; appropriation lines locked in Finance Module	Finance (14)	Real-time appropriation tracking begins; Department Head auto-alerted on approach to limit
Q2 Monthly	Monthly management accounts published to minister	Analytics (02) + Finance (14)	Ministerial MI pack auto-generated; no manual preparation needed
Q3 Mid-yr	Mid-year expenditure review: forecast vs appropriation	Finance (14) + Analytics (02)	Underspends and overspends surfaced; virements proposed if needed
Q3	FOI request received; processed within statutory deadline	Work (40) + CMS (06)	FOI handled systematically; no deadline breach; audit record complete
Q4 Nov	Annual report preparation: KPI outcomes vs plan	Analytics (02) + Strategy (21)	Performance story told with data; OKR achievement rates computed
Q4 Dec	Outturn accounts prepared; audit clearance obtained	Finance (14) + GRC (15)	Accounts submitted; audit trail fully maintained; no audit qualifications

Journey F-05: The Bank Branch Manager — Regulatory Inspection

Persona: ORG-BNK-01 (Bank Branch Manager). Scenario: Regulatory inspection announced; 4-week preparation and response cycle.

Moment	Action	Module / Tool	Experience & Outcome
Day 1	Regulatory inspection notice received; inspection response team formed	Work (40) + Teams (38)	Response team assembled; workstream owners assigned; tracker created

Day 2–3	GRC Module generates inspection readiness checklist from obligation register	GRC (15)	All regulatory requirements mapped; evidence status assessed per item
Day 3–5	Evidence gathering: pull audit records, control test results, training records	CMS (06) + GRC (15) + Learning (20)	Evidence assembled; gaps identified; remediation plan created
Day 5–10	Remediate evidence gaps: update stale controls; complete overdue training	Work (40) + Learning (20)	Gaps closed before inspector arrives; completion audit-trailed
Day 10	CRO briefing: risk dashboard, KRI status, top risks presented	Risk (33) + Analytics (02)	CRO has current picture; no surprises in front of inspector
Day 12	Inspector arrives; data room access granted via CMS permissions	CMS (06) + Security (36)	Secure, audited inspector access; no ad-hoc document sharing via email
Day 14–18	Inspector findings logged in GRC Module as issues	GRC (15)	"Management responses drafted for each finding; timeline committed to
Day 20	Inspection closed; findings report received	GRC (15)	Findings stored; remediation work items created; owners assigned
Ongoing	Remediation tracked; overdue items escalated weekly	Work (40) + GRC (15)	Next inspection: all prior findings will be closed with evidence

Appendix A: Persona Quick Reference Index

All personas defined in this document with their primary org context and most-used UME modules.

ID	Persona	Org Context	Primary Modules
IND-01	Solo Entrepreneur / Founder	Startup / Sole Trader	Strategy, Finance, Legal Entity, CRM, Sales, Work
IND-02	Serial / Multi-Venture Founder	Multi-entity Holding	Legal Entity, Investment, Finance, Board, Analytics
IND-03	Freelance / Independent Consultant	Sole Proprietor / LLC	CRM, Finance, Work, Templates, Schedule
IND-04	Gig Economy Worker	Individual / Platform	Finance, Analytics, CRM, Work
IND-05	Front-Line Employee	Any organization	Portal, Work, HR, Learning, Knowledge
IND-06	Mid-Level Knowledge Worker	Corporate / Professional Services	Portal, Work, Strategy, Learning, Analytics
IND-07	Remote / Distributed Worker	Any, fully remote	Portal, Work, Knowledge, Communications, Schedule
IND-08	Small Business Owner / Micro-Employer	SME 1–19 staff	HR, Finance, Legal Entity, CRM, Work
IND-09	Mid-Market Employer (no HR team)	50–250 staff	HR, Learning, GRC, Finance, Work, Analytics
IND-10	Large Employer	1000+ staff, multi-site	HR, Analytics, Learning, GRC, Finance, Operations
ORG-NPO-01	Non-Profit Executive Director	Charity / Foundation	Strategy, Finance, Analytics, Board, CRM, GRC
ORG-INV-01	Fund Manager / General Partner	VC / PE / Family Office	Investment, Finance, Legal Entity, CRM, Analytics, Board
ORG-BNK-01	Bank Branch / Business Unit Manager	Retail / Commercial Bank	Finance, Risk, GRC, CRM, HR, Analytics
GOV-01	Government Department Head	National / State Government	Strategy, Finance, HR, GRC, Analytics, Operations
NGO-01	INGO Country Director	International NGO	Finance, HR, GRC, Analytics, Supply Chain, Risk

Appendix B: Workflow Index by Organization Type

Code	Workflow	Org Type	Key Modules
WF-IND-01	Entrepreneur Launches New Venture	Startup / Sole Trader	Strategy, Legal Entity, Finance, Product, Sales

WF-IND-02	Independent Consultant Proposal-to-Invoice	Sole Proprietor	CRM, Templates, Work, Finance
WF-IND-03	Employer Runs Monthly Payroll	SME / Any Employer	HR, Finance, Templates, Communications
WF-B 1.1	Sole Proprietor Annual Tax Preparation	Sole Proprietorship	Finance, Legal Entity, Templates
WF-B 2.1	Partnership — Admit New Partner	General / LLP Partnership	Board, Finance, CMS, HR, Security
WF-B 2.1b	Partnership Annual Profit Allocation	Partnership	Finance, Board, Communications
WF-B 3.1	Corporation — AGM Preparation	Private / Public Company	Board, Finance, Legal Entity, CRM, Templates
WF-B 4.1	Cooperative Annual Surplus Distribution	Consumer / Worker Cooperative	Finance, Board, Communications, Templates
WF-B 5.1	Non-Profit Grant Application and Fund Management	NGO / Charity	BizDev, Finance, Analytics, Templates
WF-B 6.1	For-Profit Business 10-to-100 Scaling	For-Profit SME to Corporate	Strategy, HR, Finance, IT, Operations, Analytics
WF-B 7.1	Investment Fund — IC Deal Review	VC / PE / Family Office	Investment, Board, Finance, CRM, Templates
WF-B 8.1	Bank — AML / KYC Customer Onboarding	Bank / Financial Institution	CRM, GRC, Security, Process
WF-B 9.1	University Research Grant Lifecycle	Academia	BizDev, Finance, Work, Analytics, Knowledge
WF-B 10.1	Training Center — Corporate Contract Delivery	Training / Institute	Sales, Learning, Finance, Analytics, CRM
WF-C 1.1	Idea Validation Cycle	Pre-Incorporation	Strategy, Knowledge, Finance, BizDev
WF-C 2.1	Startup Fundraising Round	Early-Stage Startup	Investment, Finance, CRM, Legal Entity, CMS
WF-C 3.1	Geographic Market Expansion	Growth-Stage Company	Legal Entity, HR, Finance, Marketing, IT
WF-C 4.1	Leadership Succession Planning	Mature Organization	HR, Learning, Board, Analytics
WF-D 1.1	Government Annual Budget / Estimates	Government Department	Finance, Strategy, Board, Analytics
WF-D 1.2	FOI Request Management	Government / Public Body	Work, CMS, Knowledge, GRC, Communications
WF-D 2.1	Humanitarian Program Delivery	INGO	Finance, Portfolio, Supply Chain, Analytics
WF-D 3.1	Cross-Border Trade Compliance	Global Supply Chain	Security, GRC, Supply Chain, Finance, CMS
WF-D 4.1	Clinical Workforce Rostering	Healthcare	HR, Schedule, Learning, GRC, Analytics
WF-D 5.1	Professional Services Matter Lifecycle	Law / Consulting	CRM, GRC, Teams, Finance, Knowledge
WF-E 1.1	Group Entity Structure Maintenance	Corporate Group / Holding	Legal Entity, Finance, Schedule

WF-E 1.2	Transfer Pricing Documentation	Multinational Enterprise	Finance, Legal Entity, GRC, CMS
WF-E 2.1	Group Cash Pool Management	Global Corporate Treasury	Finance, Analytics
WF-E 3.1	International Expatriate Assignment	Multinational Employer	HR, Legal Entity, GRC, Finance, Templates
WF-E 4.1	Multi-Jurisdiction Regulatory Change	Global Organization	GRC, Legal Entity, Learning, Admin, Work

Appendix C: Use Case Index

ID	Title	Org Type	Modules
UC-IND-01	Sole Founder Manages Cash Runway	Startup / Sole Trader	Finance, Analytics, Sales, Investment
UC-IND-02	Independent Worker Multi-Client Workload	Sole Proprietor	Work, Schedule, Analytics, Finance, CRM
UC-IND-03	Employee Mandatory Compliance Training	All organizations	Learning, HR, Portal, Communications
UC-IND-04	Employer Hires First Employee	SME / Startup	HR, Finance, Learning, CMS, Templates
UC-B 2-01	Partnership Annual Profit Allocation	Partnership	Finance, Board, Communications, Legal Entity
UC-B 4-01	Cooperative Member Voting	Cooperative	Board, CRM, Communications, Strategy
UC-B 5-01	Non-Profit Trustee Board Cycle	Charity / Foundation	Board, Finance, Analytics, Risk, Templates
